

Bear Paw Service District Security Updates

ATTENTION - ACTION NEEDED

The Bear Paw Service District has improved our security by upgrading the entrance gates and implementing new locks for our buildings and amenities. These upgrades not only improve security; they also are less costly than our current security.

The gate will continue to have a guard present from 6am to 10pm every day. From 10pm until 6am all property owners will access Bear Paw using a “token” on a cellphone or a “fob” that is the size of a dog tag. The locks for amenities will be upgraded over the next 12 months.

To obtain a “token” or “fob” each property owner must provide information that is necessary to setup the new system. Property owners must provide the information by May 1st to gain access by May 20th. After May 1st there will be an up to two-week processing period from the time accurate information is provided until the “token” or “fob” assigned to the property owner will be activated.

Property owners may provide the required information by filling out an online form. The form can be accessed from the bearpawnc.com website by selecting the “New Stickers” page directly or by clicking the “New Stickers” button from the first page of the bearpawnc.com website.

Please visit the website for more information and to complete the form. Only information provided via the online form will be processed.
