Monthly Indicators

December 2023

U.S. existing-home sales rose from a 13-year low, climbing 0.8% from the previous month and breaking a five-month streak in which sales declined, according to the National Association of REALTORS® (NAR). Despite the increase, sales were down 7.3% compared to the same period last year, as affordability challenges continue to hinder prospective buyers. Most of this period's closed sales went under contract in October, when mortgage rates were at a two-decade high. With rates having dropped more than a full percentage point since then, existing-home sales may continue to pick up in the months ahead.

Closed Sales decreased 21.5 percent for Detached homes and 10.2 percent for Attached homes. Pending Sales decreased 11.4 percent for Detached homes but increased 2.1 percent for Attached homes. Inventory increased 95.0 percent for Detached homes and 121.6 percent for Attached homes.

The Median Sales Price was up 9.7 percent to \$949,000 for Detached homes and 11.1 percent to \$650,000 for Attached homes. Days on Market decreased 16.2 percent for Detached homes and 24.4 percent for Attached homes. Supply increased 140.0 percent for Detached homes and 175.0 percent for Attached homes.

Low levels of inventory continue to impact U.S. home sales, offering few options for aspiring buyers to choose from. Going into December there were 1.13 million units for sale, down 1.7% from the previous month but up 0.9% from the same period last year, for a 3.5 months' supply at the current sales pace. As a result, sales prices remain high nationwide, with NAR reporting the median existing-home price rose 4% annually to \$387,600 as of last measure, the fifth consecutive month of year-over-year price gains. Homebuyer demand is picking up, and without a significant increase in supply, experts believe home prices will likely remain elevated for some time to come.
