How has the Fund performed since inception?

The S&P 500® Total Return Index is a broad unmanaged index of 500 stocks, which is widely recognized as representative of the equity market in general. Please note that indices do not take into account any fees and expenses of investing in the individual securities that they track and individuals cannot invest directly in any index.

The performance information quoted in this semi-annual report assumes the reinvestment of all dividend and capital gain distributions, if any, and represents past performance, which is not a guarantee of future results. Index returns do not include expenses, which are deducted from Fund returns. The returns shown do not reflect taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. The investment return and principal value of an investment will fluctuate and, therefore, an investor’s shares, when redeemed, may be worth more or less than their original cost. Updated performance data current to the most recent month-end can be obtained by calling (877) 244-6235.
