

IT Harmony Company Profile

Value-Added Cybersecurity Distributor

About IT Harmony

IT Harmony is a **fast-growing cybersecurity value-added distributor** operating across the Gulf. Established in 2023, we may be a young company by age, but we are built on **deep industry experience** and a **clear vision** for where cybersecurity needs to go next.

From day one, our focus has been on building a **strong, carefully selected ecosystem of vendors**, with particular emphasis on **AI-driven security and data protection technologies**. We work with solutions that are designed to solve real-world security challenges — not tools that simply add complexity, cost, or noise to an already crowded security stack.

Our strength lies in our people... IT Harmony has teams on the ground across sales, pre-sales, and technical engineering, led by a **management group with over 20 years of hands-on experience** in the **Gulf market**. This regional expertise allows us to understand customer environments, regulatory requirements, and operational realities — and to support partners and customers effectively at every stage.

About IT Harmony

What sets IT Harmony apart is our **commitment to quality** and **practical innovation**. We believe in enabling our partners with cybersecurity solutions that deliver measurable value, integrate smoothly into existing environments, and genuinely improve security outcomes.

With a solid foundation, a clear focus on AI and data protection, and a strong regional presence, IT Harmony is building something different — and meaningful — for the cybersecurity ecosystem in the Middle East.

Vision

To become a trusted cybersecurity distribution partner in the Middle East, known for enabling organizations to adopt intelligent, effective, and practical security technologies that truly protect data and drive resilience in an AI-driven world.

Mission

Our mission is to empower partners and customers across the UAE and Saudi Arabia with carefully selected cybersecurity solutions focused on AI and data protection.

We work to simplify security by delivering technologies that solve real problems, reduce risk, and add measurable value — supported by strong regional expertise, hands-on technical enablement, and long-term partnerships.

Our Services

Practical services that enable successful deployment, adoption, and growth of cybersecurity solutions

Cloud & AI Services

End-to-End Vendor Solutions Implementation

Professional Services & Support

Comprehensive POC development

Pre-sales Support

Sales Management

Secure AWS cloud, data platforms, and AI-driven environments enabling scalable, reliable, and well-governed operations.

Complete implementation of cybersecurity solutions, from initial design and deployment to configuration and handover.

Expert technical services and ongoing support to ensure stability, performance, and long-term value from deployed solutions.

Structured proof-of-concept design and execution to validate technology fit, performance, and business value before full deployment.

Hands-on pre-sales assistance including solution positioning, technical workshops, architecture design, and customer presentations.

Sales enablement and deal management support to drive pipeline growth, partner success, and market expansion.

SOC Ops Solutions

STRIKEREADY

AI-Powered Security Operations Center (SOC)

Built to optimize, centralize and accelerate threat response. The platform's user-centric approach uplevels the entire security team into a proactive AI-powered cyber task force.

CARA: AI-Advisor

Alert Resolution

Incident Response

Vulnerability Management

SD Streaming Defense

Network Detection & Response (NDR)

Delivers instant threat detection by streaming all network activity into a real-time, geo-spatial map.

Network Visibility

AI-Driven Detection

Real-Time

Agentless

Unified Insider Risk Management

DTEX combines DLP, UEBA, and UAM into a powerful AI-driven platform that proactively identifies risks and prevents data loss.

Insider Risk

Behavioral DLP

Digital Forensics

Fraud, Risk & Compliance

Cyber Threat Intelligence and Digital Risk Protection

Proactively detects and neutralizes cyber threats across the surface, deep, and dark web, helping organizations protect their digital assets, monitor for risks, and ensure compliance.

Brand Protection

Threat Intelligence

Data Leakage

Unlimited Takedown

SOC Ops Solutions

/ hackuity

Vulnerability Operations Center

Unified vulnerability management platform that centralizes, normalizes, and deduplicates vulnerability and asset data from over 80 security tools.

Central UI

Prioritization

Automation

True Risk Score

AI Security & Agentic AI Solutions

AI Security

An LLM Gateway that sits between users and LLMs, whether public or private, and enforces security policy at a central enablement point for all GenAI Traffic.

Guardrails

Obfuscation

Private LLM

Sovereign AI

Agentic AI

Deploy autonomous, reasoning-based AI agents across Security, IT, and business operations with full data ownership.

Agentic AI

Automation

Data Ownership

Pre-built Apps

Network Infrastructure & Visibility Solutions

Unified DDI

Provides a unified DDI platform that brings together DNS, DHCP, and IP Address into one centralized solution. The portfolio includes Integrity, Micetro, and Live Assurance.

Centralize Control

Intelligent Automation

Cloud-Ready

Security by Design

Network & Infrastructure Management

Offers network automation and infrastructure resource modeling platform designed to help organizations manage and document their networks efficiently.

Automation

Documentation

Source of Truth

Support & Assistance

Network Automation

Turnkey network automation platform that leverages AI and no-code automation to provide proactive observability, automated troubleshooting, and outage prevention.

Automation

Auto-Discovery

Outage Prevention

Golden Assessments

Zero Trust Network Access Control

Provides automated security and policy enforcement for devices connecting to a network.

Central Reporting

Zero Trust Control

Deception

Automated Response

Network Infrastructure & Visibility Solutions

Deception Technology

Acalvio use AI-driven deception to detect, mislead, delay and derail attackers before they reach real assets. This is an active, autonomous layer that complements your existing defense.

Decoy Containment

AI Playbooks

Agentless

RBAC / SSO / Auth

THREATLOCKER

Zero Trust for Endpoints

Delivers a unified Zero Trust solution that prevents ransomware and unauthorized software from executing by controlling applications, files, and network across your environment.

Ringfencing

Network Control

Storage Control

App. Allowlisting

Awareness & Compliance Solutions

Governance, Risk, & Compliance (GRC)

A software solution designed to help organizations manage risk, ensure regulatory compliance, and streamline internal processes.

Multilingual

Unified Visibility

Data Sovereignty

Audit Readiness

Anti-Phishing & Awareness

dPhish is designed to detect and prevent phishing attacks by analyzing and blocking suspicious emails and websites.

Gamification

Adaptive Awareness

Simulation

Detection & Response

Application & Security Validation Solutions

Application Security

Enables AI-driven application security prioritization, helping organizations identify, triage, and remediate the most critical risks across applications and open-source dependencies.

SCA

Vuln. Intelligence

Risk Prioritization

Policy & Compliance

API Security

Unifies API discovery, compliance, and protection to defend against attacks, business logic abuse, and fraud.

Bot Management

Business Logic Abuse

Rate Limiting

Testing Environment

API Security

Centralized governance to APIs across all environments, enforcing consistent policies and delivering end-to-end visibility throughout the API lifecycle.

Data Security

Logging & Monitoring

Agentless

API Security Gateway

Penetration Testing

Delivers continuous, automated security assessments to identify and validate vulnerabilities before attackers do.

Risk Mapping

User-friendly Interface

Agentless

Vulnerability Scanning

Data-Centric Security Solutions

Data Security

Data security and compliance platform that delivers industry leading DSPM, Risk Remediation, DLP, Access, Privacy, Labeling, Deletion and Data Protection in one unified Data Security Platform (DSP).

Patented AI

Agentless

DSPM

Data Masking

E-7 CYBER

Blind Spot: Watermark

Comprehensive visual security solution engineered to close critical gaps in traditional data protection by addressing insider-driven threats and errors.

Screen Watermark

File/Print Watermark

Screen Control

Application Control

Access Management Solutions

Identity Access Management (IAM)

Provides advanced biometrics and password-less authentication to secure digital identities for organizations worldwide.

Biometrics

Password-less

MFA

SSO

Privileged Access Management (PAM)

Provides full control over accounts, sessions, and workflows. With automated security policies, dynamic access approvals, and continuous compliance.
