

PARASITE PROTOCOL

Overview

The below Detox Plan is meant to cleanse Parasitic Infections as parasites use toxic metals to feed, breed & hide from our immune systems. This Method works best in a repetitious 3-month plan, preferable once year. All products and steps are captured below. For the best results, follow the steps for the binder in sync with the moon cycle and take your PBX Daily. Doses broken out for Children and Adults. There are two options for Zeolite products, one with Fulvic and one without for budget friendly purposes. Fulvic acid's organic components support gut health, fostering a balanced microbiome for optimal immunity and digestion but are not necessary to detox. I have linked products individually inline below and placed package links here:
