## ABSTRACT

**Introduction** The author studies umbilical diagnosis by checking umbilical wrinkles or grooves. Curative effect by dropping only one drop of oils to the navel were observed.

### Materials & Methods

1. 8-OH-dG, Thromboxane B2 (TxB2), Substance P (Sub.P), Integrin  $\alpha 5\beta 1$ , CMV, Chlamydia pneumoniae (Ch.P), Borrelia Burgdorferi, etc. were used for the RCSs.

2. Oil 10 (Laurel Oil), Oil 14 (Cinnamon Oil), Oil 58 (Pumpkin Seed Oil) and Oil 80 (Walnut Oil) etc. were used in this study. Oils were dripped one drop on the umbilicus by using cotton swabs.

3. Directional characteristics of oils and therapeutic effect were checked by using Bi-Digital O-Ring Test (BDORT).

**Results** 1. Oil 10 was effective for depression. 2. Many cancers were improved with the combination of Oil.10 & supplements. 3. Patients with dizziness were improved by dripped one drop of Oil 10 in the umbilicus. Pain Scale and headaches were improved.

4. For patients with CIDP, CMV, Ch.P, 8-OH-dG, TxB2 decreased by dripping Oil 14 to the navel.

5. Cancers of the abdomen were seemed to be effective by dripping Oil 58.

6. Patients of atrial fibrillation with infection of Borrelia burgdorferi was observed. Combination of Oil 10 and Oil 80 were dripped in the umbilicus, Improvement of atrial fibrillation observed in heart echocardiography.

### Discussion/Conclusions

1. Various oil of plant origin was checked, but it was revealed that the directivity to the organ with a disease was different.

2. By apply a drop of oil to the umbilicus, various therapeutic effects were observed.
