Anyone who has had the satisfaction of owning a new car receives an owner's manual that tells you how to enjoy and care for the new vehicle. The manual gives you all the information that you need to operate the car. It tells you how fast to drive the car when breaking it in. It specifies the type of oil and lubricant that the car will need and how often they must be changed. A wise owner will study the instructions of the manual carefully and will follow them closely. Their suggestions are based on the fact that the manufacturers designed and built the car and know how it will perform best.

From time to time people find themselves in a hospital. The doctor is forced to tell them that they are seriously ill and that their illness is due to the misuse of the body that God has given them. We are told that 80% of the disease, excluding accidents and infections, is due to wrong health habits. Millions of people are committing suicide on the instalment plan. They are literally digging their own graves with their teeth.

The Creator and Designer of the human body has written an instruction book. Shall we call it an Owner's Manual? In this book, the Bible, God has given us some excellent advice as to how to care for our remarkable bodies. In this Book, God has told us what to put into them and what not to use in the operation of the body. How few have taken time to let God show them a better way of life. As a result, many people suffer needless pain and premature death. God does not lay down arbitrary rules just to show His authority. He gives this advice, because having made us, He knows what is best for us. Let us study His Owner's Manual.
