

# MLT-101

## SYNTHETIC-EP

# PENETRATING LUBRICANT

With Micro Lubrication Technology®

## INDUSTRIAL STRENGTH For All Shop Applications

**#1 ENEMY OF RUST! #1 in LUBRICATION!**

- Penetrates Rust and Corrosion
- Lasting Lubricant
- Loosens Sticky Mechanisms
- Lubricates as it Penetrates
- Displaces Moisture
- Cleans and Retards Electrical Corrosion

### MLT-101 Synthetic Penetrating Lubricant

BestLine's Synthetic MLT-101 Penetrating Lubricant with patented Micro Lubrication Technology® (MLT) is the most advanced industrial multi-purpose penetrating lubricant in the market. MLT-101 was formulated to work in the most extreme conditions to quickly penetrate rust and corrosion while providing a protective barrier of lubricant. MLT-101 will dissolve the oxides on electrical contacts while loosening the metal components. MLT-101 offers the highest dielectric strength industrial products on the market today to be used to enhance electrical contact. This product was designed specifically for industrial purposes and has been successfully tested in extreme circumstances. MLT-101 can be used in all applications around vehicles, boats, machining, heavy equipment or any place corrosion or lubrication is a problem.
