

## MISSION CRITICAL ASSESSMENT PORTFOLIO© (MAP)

Prepared by: Dr. Tim O. Paal, Board Chair, Founder/CEO

### MAP APPLICATION

The Mission Critical Assessment Portfolio Process Appraisal and Certification (MAP-PAC) program was developed for busy data center professionals who desire to complete an advanced certification but are limited by time and budget. This process was adapted and designed for use in mission critical education by the Founder and Chief Executive Officer of the Advancing Achievers Technology Center (AATC) Mission Critical, Dr. Tim Oergel Paal. This program has been certified by the Advancing Academia Commission on Higher Education (AACHE Accreditation Commission) as an acceptable method of earning an advance certification in Mission Critical Operations.

A portfolio is a compilation of data assembled in an approved format to demonstrate college-level knowledge for an award of credit. Often compiled like a notebook, each portfolio may contain submissions justifying course credit. The portfolio you submit will serve as proof of your expertise and the value it has in the academic world. It can include knowledge or skills gained from a variety of sources, but these are some of the more common ones used for portfolio assessment:

- Portfolio Assessment for Prior Learning Experience is an established and universally accepted method of earning credits for advanced level work.
- Every Digital Warrior Certification Program candidate must complete a Mission Critical Assessment Portfolio. Your MAP will remain open and contain all the verification needed to complete your certificate program. Once this process is completed, your MAP will receive final assessment, and the results will be certified by the Portfolio Assessment Counselor (PAC) who will verify your eligibility and schedule your certification.
- To complete the certification program, candidates must have completed the requirements of MAP Program or its equivalent. The Mission Critical Assessment Portfolio is a flexible, efficient way of earning credit for what you have learned outside the classroom. It also saves countless tuition dollars and needless classroom hours.
- The Portfolio was adopted with the understanding that the college-level learning, no matter how gained, warrants credit. Therefore, nearly any area of learning can be converted into credit if it is taught at an AACHE Certified Institute Certified Teaching Alliance, (CTA) or Independent Service Provider, (ISP) and you can prove your expertise in it.

### REQUEST A MAP Application:

*Candidate completes the MAP Application form and submits it along with the portfolio evaluation fee if not already paid (\$750 Non-Veteran, \$350 Veteran, non-refundable) to the us for payment. Once payment is processed, the facilitator submits the form and the portfolio to the Digital Warrior Instructor for forwarding to the reviewer. **Send Payment and Inquiries to: [ceo@leadership-logic.com](mailto:ceo@leadership-logic.com)***
