

Maneesh, an engineer at heart with an entrepreneurial mindset, graduated from BITS, Pilani (Mechanical) and has done leadership programs from IIM, Bangalore. In last 27 years, Maneesh has worked in diverse industries covering Energy, Petrochemical, Automotive, Aerospace, Industrial, Buildings and Transportation. Worked with companies like Honeywell, FEV, GE, Punj Lloyd, Getrag. He has experience across product value chain and across the plant life cycle of complex process plants.

He has driven transformation across marketing/design/technology/ supply chain/manufacturing functions by influencing business models, technology adoption (including DIGITAL) and driving innovation to launch new products/solutions. Led programs for new product development and optimizing product TCO (Total Cost of Ownership). Has set up & grown start-ups around business, engineering, manufacturing & supply chain consulting. Maneesh values 'customer obsession' that he embraced while leading sales and project delivery in more than 20 countries.

Maneesh brings-in rich experience around Industry 4.0. Adept OT (Operation Technology) professional who embraced "Web & Digital" to monetize "Data". Led product management of IIoT programs and leveraged Analytics/AI/ML for data driven decisions/predictions/prescriptions to achieve cost savings, higher asset availability, enhanced user experience and people safety.

Maneesh mentors IIoT/AI/ML start-ups on a pro bono basis and passionate about talent development, coaching and mentoring.
