## Core Competencies

### PROJECT MANAGEMENT & EXECUTION SUPPORT

Specialize in the management and execution of technical infosec, cyber security, homeland security, and critical infrastructure assessment studies and projects.

### CYBER & INFOSEC ASSESSMENTS

We possess a deep understanding of the many cyber security assessment frameworks and have developed a maturity model for NIST 800-53 that provides an order-of-implementation for the 1000+ security controls.

### CYBER DISRUPTION RESPONSE PLANNING

Our founder completed the first Cyber Disruption Response Plan for FEMA, initiating an entirely new way of capturing risks, implementing mitigations, and developing a response capability for large-scale disruptions to our cyber infrastructure.

### EXAMINING RISK & RISK ASSESSMENTS

We have developed a unique functions-based risk assessment approach (function->process->system->asset) to capture and quantify risk.

## Differentiators

### WE UNDERSTAND OUR ROLE

Our goal is to make your organization and your sponsor look great by delivering innovative, world-class products.

### WE INNOVATE

We take a fresh look at needs across a wide variety of security-related domains and deliver innovative and elegant solutions.

### WE DELIVER QUALITY

We have uncompromising standards for what constitutes an acceptable deliverable.

### WE ARE SERVANT LEADERS

We believe in empowering the team to perform at their highest level.

## Past Performances

Our founder has served as the Principal Investigator or Project Manager on a number of large-scale government projects:

- Cyber Disruption Response Plan (New England, Metro Boston, City of Houston, San Diego Co.), FEMA RCPGP and OCSP (URS Corp. & ANL)
- Complex Coordinated Terrorist Attack TA, FEMA OCSP (ANL)
- Regional Resilience Assessment Program (MA Water & Energy, Port of LA/LB, & New Mexico Cyber RRAPS), DHS IP (URS & ANL)
- Automated Streams Analysis for Public Safety, NIST (Lafayette Group)
