

AA Webinar 1 - Human-Nature Nexus : Imperatives For ASEAN

We hope to build a strong ASEAN's position for protecting nature, given its status as one of the megadiverse regions of the world.

Through the webinar, we hope to draw attention on the importance of human-nature nexus for protecting biodiversity, its loss being exemplified by the serious threats to human well-being (in particular Covid-19), socio-economic development, and environmental sustainability.

Furthermore, it is imperative to consider the significance in role that the Indigenous Peoples & Local Communities (IPLCs) has to play in terms of cementing key initiatives taken by governments for many years to come. This coincides with the thematic focus of the CBD's COP15, namely the Post-2020 Global Biodiversity Framework (GBF) -- Living in Harmony with Nature -- and the bold initiative undertaken by the Campaign for Nature to set aside at least 30 percent of earth as protected or conserved areas by 2030.

1. To what extent should priorities be given to the notion of states committing to achieving a national level of 30% for the designation of protected areas?

- ☐ High
- ☐ Low
- ☐ No Opinion

2. Should ASEAN support the '30 by 30' initiative?

- ☐ Yes
- ☐ No

3. Indigenous & local communities are seen to be key conservators of forests, apart from governments.

- ☐ Yes
- ☐ No

4. Do you think the current pandemic of Covid19 happened because of the destruction to our nature?

- ☐ Yes
- ☐ No

5. Any further comments, feel free to provide in the space below:

Professional Detail

It would very much help us to consolidate your responses through a benchmarked system. Therefore we would greatly appreciate if you can provide us certain details regarding yourself. Thank you very much for your time.

6. First Name

7. Job title
