

HEAT TECHNOLOGY

2025 COLLECTION

WINTER RIDES?...
FEEL THE HEAT.

In 2023, we've totally revamped our range of heated gloves, in a desire to make them even safer, more practical, and high-performance.

The four styles that make up our HG range share a common set of characteristics, including:

- ERGO PROTECH™ protective elements
- PRIMALOFT® thermal insulation
- The 5_DRYTECH™ waterproof, breathable membrane (except for the HG Prime GTX, which features a GORE-TEX® membrane)
- The latest generation of our FIVE battery-powered heating system that includes an electrical-filament circuit that goes over the back of your hand and down the fingers, all the way to the inside of the last finger
- A new design that lets you to recharge your batteries while you ride. (Using the optional Connection Kit cable, which you can purchase from your FIVE reseller.)
- And lastly, our brand-new DUAL CONTROL adjustment and control system

Each style then stands out due to its external construction and a few details related to design, materials, or finish.

The HG Prime GTX epitomizes the modern spirit and heads up the range with its GORE-TEX® membrane, heat-sealed, seamless Softshell topside construction inspired by extreme sports, and full-grain leather palm.

The HG1 Evo WP gives pride of place to leather, using it both for its topside construction and on its palm. It also features a 5_DRYTECH™ waterproof, breathable membrane, like its lower-end siblings.

The HG2 Evo WP blends nylon topside construction with a leather palm, offering riding pleasure to a wider audience.

The HG3 Evo WP, the most affordable style in the range, which is also available for women as the HG3 Evo WP Woman, opts for a “no-leather” vegan solution, with nylon topside construction and a Nash synthetic palm.

Each style is perfectly positioned to offer the best possible value for money, depending on your preferences and your budget, whether you love the most advanced products like the HG Prime GTX, reliable choices like the mostly leather HG1 Evo WP, versatile options like the HG2 Evo WP, or affordable, entry-level styles like the HG3 Evo WP.
