VERTEBRATES

IF IT HAS A BACKBONE IT HAS A ENDOCANNABIOND SYSTEM

Vertebrates /ˈvɜːrtɪbrɪts/ comprise all species of animals within the subphylum Vertebrata /-eɪ/(chordates with backbones). Vertebrates represent the overwhelming majority of the phylum Chordata, with currently about 66,000 species described.[4] Vertebrates include the jawless fish and the jawed vertebrates, which include the cartilaginous fishes (sharks, rays, and ratfish) and the bony fishes.

Reptiles:

- Alligator
- Bearded dragon
- Blind snake
- Boa
- Caiman
- Crocodile
- Cobra
- Gavial
- Iguana
- Komodo dragon
- Legless lizard
- Rattlesnake
- Tortoise
- Tuatara
- Turtle
- Viper
- Worm lizard

Fish:

- Anglerfish
- Betta fish
- Catfish
- Eel
- Goldfish
- Lamprey
- Lungfish
- Pufferfish
- Ray
- Sea dragon
- Seahorse
- Shark
- Swordfish
- Tuna

Amphibians:

- Chinese giant salamander
- Common frog
- European fire-bellied toad
- Goliath frog
- Iberian ribbed newt
- Leaf green tree frog
- golden frog
- Pool frog
- Red-eyed tree frog
- Rough-skinned newt
- Spotted salamander
- South American caecilian

Birds:

- Budgerigar
- Canary
- Crane
- Dove
- Duck
- Eagle
- Flamingo
- Goldfinch
- Heron
- Hummingbird
- Owl
- Parakeet
- Parrot
- Penguin
- Puffin
- Raven
- Robin
- Shoebill
- Toucan

Mammals:

- Bear
- Camel
- Cat
- Chimpanzee
- Chinchilla
- Cow
- Deer
- Dog
- Elephant
- Giraffe
- Gorilla
- Hippopotamus
- Horse
- Human
- Kangaroo
- Leopard
- Lynx
- Mouse
- Platypus
- Rabbit
- Rat
- Rhinoceros
- Sheep
- Tiger
- Titi monkey
