

Khem Precision Machining

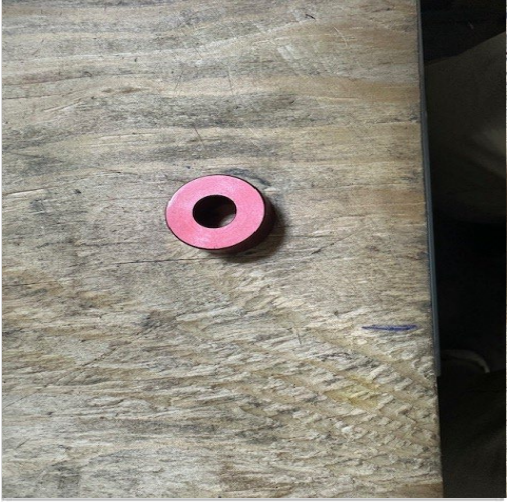

Swiss CNC Machining - High Precision Parts

Our Machine

Sample Parts

Khem Precision Machining

Precision CNC Swiss Turning - 2 mm to 36 mm OD • 5 mm to 360 mm length • 12-axis Maier ML36

What we do

We machine high-precision metal and plastic parts for small to medium production runs and prototypes. Materials: stainless steel, brass, aluminum, nylon, Delrin, and more.

Capabilities

- Maier ML36 - 12-axis Swiss-type CNC with automatic bar feeder
- Diameter range: 2 mm - 36 mm
- Max part length: up to 360 mm (typical: 5-360 mm)
- Operations: turning, threading, cross-drilling, knurling, plastic machining
