

Again Squawk

Headline about geese again

It's time to lay off

Write about the beauty of the creature

How our lives have been made fuller by their presence

It's time for a change and appreciation of all existence

God put these beautiful birds for us to protect from their predators

Do we want to be their predators?

From their viewpoint it hasn't been easy with modernization

Their homes have dwindled

The geese are not at fault

Man has taken away their space

They have done nothing!

I believe in the philosophy of respect for all living creatures

Once they are dead

You can't bring them back

Try to raise them from the dead

God gave us these creatures to take care of

Animal Right Groups I thank you

For saving different species that would have been extinct

Now everybody lay off the bird

Fly someplace else with your squawk news
