

## Clouds

Bouncy pure white clouds hovering in the powder blue sky  
As the majestic birds fly to their heights screaming  
In the ecstasy of their altitude with their freedom of flight  
Among all the sail boats dredging aimlessly  
As the water switches colors in lanes of harmonizing hues  
Of greenish turquoise- bluish aqua-purplish violet  
Blending with the glistening yellowish gold hot sand of the nearby beaches  
Old weathered brownish bronze trees sprouting around in this environment  
Speed boats dashing waving foams as in haste they disappear  
An orange rust copper colored speckled butterfly charms around  
With the breezy cool winds accompanying it's movements  
Capture life in a capsule  
As another yellow mauve butterfly joins in my contentment  
This second of life caught in this frame of a photograph  
To remember and never enter again
