

## Cure

If we all stand up for a cause  
Immense results occur to further positive action  
If altogether diligently working for a cure  
We all do our part from a busy schedule  
No one wants to get involved unless it is for their necessity  
In the most direct possible words spoken  
I want a cure for all disease  
Especially multiple sclerosis  
The debilitating effects of the disease take away  
Freedom of movement to be your complete self  
I can only strive to inform all to please help in some way  
So the amazing technology of today can possibly produce  
Significant results and we win out against this disease  
That cripples down the bodily system  
To write this down is not enough but if this can help  
To inform others that we can all do our part  
In any possible way because I feel  
The suffering of loved ones and to do something  
As time swiftly passes is not beyond our control  
I believe there is a cure for multiple sclerosis
