

Donatello

Enthralling beauty surviving the centuries

I gaze in amazing astonishment

I'm completely captivated now

The work of a gifted genius always stands out

Watching the bronze figures so realistic

I can feel the human side of Donatello today

The time consumed to dedicate oneself to art

It comes from the inside into your work

Pouring out completely

Capturing and holding you forever

To give of yourself entirely to your art

Marble pieces entranced me so completely

To really feel by seeing familiar gestures

That only man can have

Versatility reaching limits beyond his time

Because he was born in the Italian Renaissance period

The use of terra- cotta was also one of his endeavors

As never done before

For us to enjoy his newest concepts

In his dramatic expressive figures

Donatello your unique talent is praised through the centuries
