

Involved

To fully understand the debilitating effects of muscular dystrophy

Is only possible if one endures the pain of the disease

But knowledge is power

And to inform all to get involved

If they feel within themselves

To make a difference

Not let life pass them by

Without giving their best to humanity

Not being involved if they are not the victim

Because there is a need

And the justification that everyone counts

No matter who they are

We all feel the depth of our existence

If a cure is a possibility

It will alleviate suffering

Let a cure be found and an involvement be present

So they will not need to suffer in future generations to come

A cure should be found for muscular dystrophy

No one needs to be left out

Everyone counts
