

## Letter

I am writing to let everyone know

I think American workers and American cars are the best

It is not the fault of the American workers that there were no fair regulations

For the over saturation of cheaper cars from the Outer Limits

We needed a fair playing field - of course people will buy what is cheaper

If the cars from the Outer Limits would have been a few thousand dollars more

They would have gone back to where they came from

Everyone likes a bargain - especially on a big item

The Outer Limits were making huge-huge-huge profits here

Anyhow I am not a politician but a poet

I was wondering why they don't have a Detroit Car Workers Aid Concert.

All those wonderful American country singers have a Farm-Aid Concert

How about Eminem - Aretha Franklin- Madonna- Kid Rock-Diana Ross-Jack White?

And how about Tim Allen and Jeff Daniels hosting the Detroit Car Workers Aid Concert

The proceeds would go for new jobs for the middle class at Chrysler-Ford-GM

We have to back our America workers

The American car companies provided good jobs for so many workers

We need manufacturing jobs right here so no one is jobless-homeless-hungry
