

Outer Limits

They have taken our jobs to the outer limits
Where no taxes are taken out for our social security and Medicare
And they call it free trade
Well if we can't have our good paying jobs
But have to work two or three jobs to survive
How free is that?
No weekends ever off
Well it's time to put a tax
Half for social security and half for Medicare
On all cars coming from free trade
Make the cars a competitive price with the outer limits
Whatever dollar amount it takes to compete with free trade
Anyone can buy whatever car they want
We can't reach to the outer limits
We need jobs right here
And if they go out to the outer limits for their profits
Are we to look to the outer limits for our jobs and benefits?
