- Innovation in online learning

## On-site and Online

- Create hybrid classes
- Documents student achievement
- Accelerate at Your Pace
- Show Competency
- Technology Agnostic (Android or iOS)

## TechEDGE Accredited Digital Micro-courses

### Workforce Training. Online Course Assets. Skill. Upskill. Reskill.

- ♦ 1-4 hours workforce development micro-courses with assessments. Can be taken as stand-alone, grouped for *micro-credential badging*, or integrated into new or existing online courses
- ♦ Electronic tracking with certificate of completion to submit to employer or professor
- ♦ It gives college administrators the ability to offer their workforce training office or faculty support without taking anything away
- When integrated into online courses, faculty retain the control of their courses by assigning only the lectures/assets they feel are relevant to their course and the learning outcomes of their course.
- Digital materials can be assigned as needed as the students move toward the completion of the semester/term.

## Build with Confidence

Let TechEDGE be your partner in building new or upgrading existing workforce training and degrees.

## Ensure Completion

Assessment driven that the students cannot complete the material until awarded their certificate of completion.

## Design for Success

Gain confidence in building courses that students find:

- Challenging
- Consistent
- Convenient

## Pricing

Offered as a semester-based subscription, one license per student for all the students in your department, division, college or university.

To help colleges take advantage of this opportunity, we are offering the initial subscription at half price (\$100/student).

Ask about how our digital assets can be used to offer workforce training, badging, and upskilling workers and business clients, NOW!

## TURN-KEY

Ready when you are. Workforce training “white label” with your college look and feel.

## EASE OF INTEGRATION

TechEDGE’s goal is to support your workforce initiative and provide academic support if you want additional assistance to design your online/hybrid class

## TECHNICAL SUPPORT

Exceptional “up time” with rapid technical support to keep things running smoothly,
