EXPLORING A TINY WORLD THROUGH ART

There is so much to observe in our world when we stop and look closely at small details. During this week of tiny exploration adventures, we will create art that will bring our nature observations to life:

- Construct a book for nature journaling
- Make your own watercolor paints to capture your tiny world observations
- Create moss wall art with gathered objects
- Design a found and foraged woodland house

July 7 - 11, 2025
