

Maternal Angels

The Maternal Angels Program at Duke Birthing Center is a program tailored to provide services to mothers and newborn babies. The Duke Birthing Center serves all women who deliver at Duke Hospital. The Birthing Center is special because it is a place where families begin for a lifelong journey. We value the care our moms, newborns and families receive as we keep them in the center of everything we do. The role of the Maternal Angel volunteer is to provide social interaction and crafts with mommies to be and to listen compassionately and empathetically. The Maternal Angel is crucial in maintaining a friendly, caring and warm demeanor in their interactions with patients, visitors, and staff.
