

# COMPRESSIBLE RAIL SAFETY SCOTCH BLOCKS

Reducing the risk of high cost derailments across the rail industry

## Why choose Kildens Compressible Scotch Blocks?

- reduces risk of derailments
- reduces incident investigation costs
- fast becoming industry standard
- high visibility
- quality components
- used by leading names in rail industry

Redefining  
the  
standard in  
**Rail Safety  
Scotch  
Blocks**

Designed with one thing in mind, to **reduce the risk of derailments in the rail industry**. Extensive research and design in partnership with leading rail operators has developed a high quality **Rail Safety Scotch Block** that is fast becoming the industry standard. The **two piece design foam & wood** ensures constant adhesion with block and wheelset. This limits wheelset height travel and reduces chances of derailment.

Available in multiple designs to suit all rolling stock requirements

Used by leading companies

**GB Railfreight**

**ALSTOM**

**Govia**

**SIEMENS**

**BOMBARDIER**
