Caremed
Healthcare® Group

Equipment Catalogue

MAKING CARE EASIER, SAFER AND QUICKER

Here at Caremed our promise to you is that all our healthcare equipment is accurately specified, rapidly deployed and impeccably clean.

We provide the highest quality healthcare equipment all based around our philosophy:

1

Protect the patient
from discomfort and make transfers less disruptive.

2

Protect the hospital staff
from the risks of manual handling and back strain.

3

Protect the organisation
by providing safe, fit for purpose and well maintained equipment.

We offer:

Purchase

You can purchase from us via a direct purchase order or the

NHS Supply Chain portal.

- 👍 Own your equipment outright.
- 👍 Buy brand new to the exact spec you want.
- 👍 Use spends from charitable money raised or funds for your department to get exactly the product you need.
- 👍 Peace of mind, no need to renew leases or rental – the product is yours.

Managed Equipment Service

We offer a simple NHS compliant managed equipment solution, here at Caremed.

- 👍 Spread the cost of acquiring capital equipment over a period of 3-to-7 year lease, maintenance included.
- 👍 Upgrade or invest in additional or extra equipment without needing large capital funds upfront.
- 👍 After the lease term, there is the option to own the equipment for a nominal fee.

Rental

Rental is a great option if you have short term patients, or short term needs.

- 👍 Access to the latest equipment without having a large one-off payment.
- 👍 Suitable for patients who are only with you in the short term.
- 👍 No servicing and repair costs.
- 👍 We deliver within 24 hours on most equipment.

WHERE DO YOU WORK?

Caremed Healthcare® Group exists to serve healthcare professionals and we spend time talking to, working alongside and sharing the challenges of carers, nurses, therapists, surgeons and of course, patients themselves.

We support Intensive Care teams with specialist seating designed to promote early mobilisation. Our chairs reduce manual handling risks, improve patient safety, enhance pressure care and comfort, and encourage patients to sit out sooner – supporting recovery from day one.

Partnering with theatre and recovery professionals, we enable facilities to increase their throughput and reduce unnecessary equipment and patient transfers.

How is this possible? By providing seating options that replace trolleys, chairs and beds to enable the patient journey to take place on just one, highly versatile, mobile surface.

Portering is the backbone of hospital flow – and our products are built to lighten that load. From powered drive chairs to agile transport seating, we support hospital porters by reducing physical strain, improving control in tight spaces, and making every transfer safer and smoother. It's not just about moving patients – it's about making every journey easier.

CAREMED HEALTHCARE – THE HOME OF LAYFLAT® SEATING

Layflat® Seating offers a range of benefits for individuals in a hospital environment; whether recovering from a serious illness or injury or simply seeking to improve their well-being. Here are some of the key advantages of layflat seating:

-  **Early Mobilisation:** Restoring functional mobility and independence in patients is crucial in order to accelerate the recovery process.
-  **Improved comfort and positioning:** Layflat chairs are a type of adjustable chair that allows patients to be positioned in a variety of ways.
-  **Mobility:** Layflat Seating enables patients to be moved easily unlike beds – the patient can easily be moved from ward to ward, or outside to a critical care garden (“garden power”).
-  **Enhanced circulation:** Layflat seating can improve circulation throughout the body by elevating the legs and feet.
-  **Facilitated rehabilitation:** Layflat chairs can be used to help patients with rehabilitation exercises.
-  **Reduced pressure sore risk:** Layflat seating can help reduce the risk of pressure sores by distributing weight evenly and reducing pressure on specific areas of the skin.
-  **Improved manual handling:** By enabling the Layflat function on a care chair and pairing it up next to a hospital bed, the HCP is able to pat slide the patient from bed to chair, further enabling early mobilisation.
-  **Increased independence and activity:** Layflat seating can promote independence and activity.

Our range of Layflat Seating has been developed and manufactured right here in the UK. Most of its core components are made right here in Britain too – allowing for us to use the Made in Britain logo. By manufacturing locally, over importing, we can demonstrate that we are reducing the CO² emissions per chair sold by almost 1 tonne per chair.

CH5 Mobilise chair® with Layflat®

An innovative, early mobilisation chair that lays 100% flat and has a unique legrest that encourages sit to standing, this chair is manufactured in the UK, using UK materials which greatly reduces leadtimes.

Averages 10-12cm between bed & chair

Specifications

Lay flat dimensions: 1830mm x 560mm

Seat width 510 - 560mm

Height 520 - 820mm

Hi-lo range 490 - 790mm

Wheel castors: total & directional lock 125mm

Safe working load 160kg

Features

- ✓ Multi-purpose early mobilisation chair
 - ✓ Lays 100% flat
 - ✓ Sit to standing option
 - ✓ Seat tilt with Trendelenburg
 - ✓ Works with the Arjo Stedy to facilitate a seamless transfer
 - ✓ Retractable legrest - fully retracts beneath the seat so easier sit to standing
 - ✓ Armrest width adjustable
 - ✓ Headrest adjustable
 - ✓ Strong, padded removable armrests
- The CH5 chair has thick cushion base with different seating options – depending on patient
- ✓ Easily remove the seat and back cushions for cleaning
 - ✓ Tough, soft touch Fortitude® material, with minimal stitching

*Mobilise Chair Cushion

The Mobilise CH5 Chair is built to encourage early mobilisation of patients, designed to make rehabilitation easier, quicker and safer.

Features

- ✓ Optional IV pole and bracket for the Mobilise chair
- ✓ Now available with optional wings or adjustable laterls
- ✓ Neuro and mouldable headrests available

Some additional functions:

Manual Handling

Lay flat option reduces the need for hoists

Retractable legrest

Fully retracts beneath the seat so easier sit to standing

Easy to move

Allows patients to be moved outside or to other wards if necessary

Versatile

Simple and easy to use handset with icons for ease of use

Seating options

Depending on the needs of the patient, different cushioning seating options are available

No stooping

It is easier to administer care to the patient as you can get far closer when the patient is in the chair

Armrests are designed to hang catheter bags and drains on

Portable ventilators, monitors, etc., can all be hung from the back of the chair

The IV pole & bracket

It is directly attached to the patient's chair, facilitating easier patient care and monitoring

With optional lateral support

Ideal for patients needing thoracic or trunk support

Optional shoulder wings

No need for a spring; simply lift and swing them out of the way. They have 3 positions: closed, splayed, and open

Scan to watch our video here for a simple pat slide demo using our Mobilise® CH5 chair with the Layflat® feature, or [Click here!](#)

Neuro Supportive Headrest

Provides stable support for patients with head positioning, reducing strain on the neck and improving posture

Neuro Mouldable Headrest

It offers enhanced comfort and support by conforming to the shape of the head, ensuring a more comfortable and secure experience

You can purchase, hire or lease these chairs, making acquisition easy regardless of your funding preferences or budget situation.

Aftersales service:

We can work with your trust to provide a simple consignment stock / call off agreement for parts with pricing fixed for 12 months at a time.

This keeps your chairs in action and maximises their lifetime and availability for patients. During the lifetime of the product, we offer a full repair and maintenance service, and at the end of life, a recycle-trade-in / trade-up scheme.

Bariatric CH5 Mobilise chair® with Layflat®

TESTIMONIALS

We've received fantastic feedback from customers about our Mobilise early mobilisation care chairs – here are just a few highlights!

The early mobilisation chair helps us get Critical Care patients out of bed, with less resource – ultimately this leads to a shorter stay in ITU.

- Physiotherapist, Critical Care, London

Our main issue is transporting patients out into the hospital grounds. Unit chairs are difficult to manoeuvre. However, an early mobilisation chair solves this problem.

ITU, Sunderland Royal -

Thank you for the CH5 chair, we use it almost daily on ITU at this time. We are using the chair with a whole variety of patients, from those who require too much support from the bed but are able to stand from a chair, to those who have a tracheostomy and are ventilated. We find this chair is so simple to use, nursing staff are more open to using it as they use a pat slide much more regularly than a hoist and therefore patients aren't only sitting out when therapy are involved.

With our ventilated tracheostomy patients, we are finding that they are getting up and out of bed sooner and therefore weaning from the ventilator quicker and in turn getting up and on their feet quicker than before. This then of course supports hospital flow as patients are being discharged to the ward at a much better physical level and therefore returning home rather than a community setting.

After using this for a few months now, we wouldn't hesitate to recommend this chair to any other team/unit as it really has helped us, especially with our complex patients. It's easy to use, nursing staff are much more keen to get the patients out of bed pat sliding, and we are able to rehab effectively from the chair.

- Physio, Intensive Care, Whiston

TX-SERIES BENEFITS

New concept of comfort

The TX Series has been designed with the patient and their wellbeing in mind. The ergonomic design is made with sculpted polyurethane foam which encourages even distribution of weight during use.

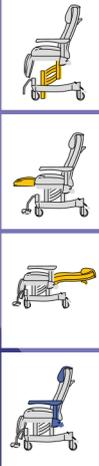

The chair delivers reassurance and ease of functionality for patients during their recovery, with the end result being improved mobilisation and the reduction of risk of contact pressures.

BENEFITS OF SITTING OUT

- Reduce length of stay
- Increased blood circulation
- Greater joint and muscle mobility
- Greater patient autonomy

TX25E multifunctional hospital chair

Specifications

Total	Length	950-1745mm
	Width	750mm
	Height	1230-1560mm
Seat width	540mm	
SWL	190kg	

Features

- The TX25E is electrically operated with battery backup
- Height adjustable; 490 – 820mm
- 160° of backrest recline, and an elevating legrest, giving a near layflat position
- Drop-down arms for easy side transfers
- Headrest and armrests manually adjustable

The TX25 Electric is suitable for a wide range of patients and clinical settings. Height adjustable, this care chair comes with electric independent adjustments of the chair and four 125mm castors.

TX25M ward hospital chair

Features

- 160 degree backrest recline and elevating legrest giving near layflat position
- Gas spring adjustment for independent chair movement
- Drop down arms for easy side transfers
- Adjustable seat height 490 – 820mm
- Over 15 colour options available

Specifications

Total	Length	950-1745mm
	Width	750mm
	Height	1265-1540mm
Seat Width	540mm	
SWL	190kg	

The TX25M chair is equipped with a hydraulic based system offering variable height and dual controls each side of the base. The chair has 4 swivel castors including 2 to the rear with braking and tracking.

TX26M

Features

- Hydraulic height adjustment on wheels
- Independent sections adjustment through gas springs
- Manually adjustable headrest and armrests
- Push handle with integrated tilt adjustment

Specifically designed for patients with reduced mobility, the TX26M Chair is equipped with height adjustment through a hydraulic system driven by foot control. The chair can be laid to 160 degrees.

The seat is manufactured with a powder coated steel frame. Viscoelastic thermoformed foam provides extra comfort and protection from ulcer formation for patients who may be at risk.

Trendelenburg position

MODSEL – NURSING MADE EASIER

As part of the NHS recovery plan, day surgeries and elective surgeries are taking on greater importance for the foreseeable future. Our new Modsel range is the ideal solution. The range of convertible chairs and stretchers can improve productivity and reduce unnecessary equipment and transfers.

DAY SURGERY - CHAIRS

These items have been developed with day surgery professionals across the global marketplace, whose input has led to innovative features such as ultra-low entry height, a leg rest that retracts fully back on the contour recline chair (for easy access) and simple controls.

Using a contour recline chair has the potential to replace a wheelchair, a stretcher trolley and recovery bed, meaning that the patient journey starts and ends on one piece of equipment.

ACCIDENT AND EMERGENCY (A&E) / EMERGENCY DEPARTMENTS

These chairs have been designed in collaboration with frontline emergency clinicians to support the fast-paced and unpredictable environment of the Emergency Department (ED). Their versatility allows clinicians to assess, treat, and transfer patients efficiently – all in one unit.

MODSEL POWERED BARIATRIC WHEELCHAIR

Take all the human effort out of pushing and manoeuvring chairs with an intuitive and intelligent drive system designed for easy use by any operator.

Features

- ☑ Multi-purpose transfer chair with powered drive
- ☑ Excellent 400kg weight capacity
- ☑ Intuitive forward, back and sideways drive
- ☑ Powerful electric centre steer wheel with rechargeable battery
- ☑ Twin wheel 150mm castors with total lock
- ☑ Seat Size: 650mm wide x 590mm deep x 530mm high
- ☑ Easily remove the seat and back cushions for cleaning
- ☑ Thick cushion base with quality layered foam
- ☑ Tough, soft touch, easy to clean vinyl
- ☑ Generous sized fold up foot plates for easy access
- ☑ Strong padded armrests with no protrusions
- ☑ Accessorise with IV poles, oxy holders or seat belt

Specifications

Overall size	Length	1360mm
	Width	780mm
	Height	1190mm
SWL	400kg	
Code	MPC-C-ENT-EDU	

More detailed features

Ergonomic
Drive effortlessly in any direction by only a light touch.

Intuitive
Perfect positioning of the drive controls for the operator.

Easy access
The large foot plates offer generous support to the patient and lift quickly for clear egress.

Versatile
Use the storage shelf during transport or add accessories such as IV poles, oxygen holders.

More detailed features

Organised

An energy document holder provides organised storage and quick access to important paperwork.

Sideways

movement
The rotating design allows the chair to be moved in any direction.

Dropdown armrests

The armrests can be fully lowered to a low profile for ease of side egress.

Power assisted driving

An electric driven wheel on the floor provides excellent traction and centre steering.

The Modsel Bariatric Wheelchair helps prevent the most common carer strain injuries by taking the back twist out of moving heavy weight forwards, backwards and sideways. Patients are positioned comfortably with a gentle recline and feet fully supported.

MODSEL CONTOUR RECLINE CHAIR

A multi-purpose treatment and transfer chair for ED, Day Surgery, Clinics and Aged Care.

This chair is easy to move in and out of tight areas. Patients can be positioned simply from sitting upright to full recline, or lay completely flat; with the stability of twin columns under the chair making it ideal for CPR or specialised procedures.

A versatile chair to streamline medical procedures and recovery across healthcare facilities.

Features

- 460 - 840mm height range with lie-flat and forward / reverse tilt
- Easy egress - forward tilt facilitates easy getting in and out of the chair
- Glide-away dropsides with no protrusions
- Steer/brake pedals on both sides
- 100mm thick premium, removable mattress
- Twin wheel 150mm castors with double steer
- Pop-up push handles ensure best operator positioning while preventing transfer movement to the patient
- Safe working load of 300Kg

Specifications

Overall size	780 x 1150mm (1750mm lying flat)
Seat width	650mm (+100mm wider option available)
Weight	110kg
Sockets on all four corners for accessories	
Code	MPC-C-RET

MODSEL CONTOUR RECLINE VERTEX CHAIR

An exceptional treatment chair which lies flat, allows for accurate head positioning with an infinitely adjustable headrest - suitable for Eye, ENT, Plastics and Dental.

The ultra-low height is combined with dropside armrests that glide down vertically under the chair top to provide safe access with no protrusions to catch on the patient's legs or clothes.

Features

- Ultra-thin headrest design for best surgeon clearance
- Scalloped head cushion
- 460 - 840mm height range with lie-flat and forward/reverse tilt
- Conveniently stored handles unfold for staff friendly transportation.
- Glide-away dropsides
- Steer/brake pedals on both sides
- 100mm thick premium, removable mattress
- Twin wheel 150mm castors
- Safe working load of 300Kg

Specifications

EQUIPMENT RENTAL

Serving NHS and Private Hospitals
with High Quality Rental Equipment
365/24/7

Short term rental

We believe that our rental division deserves a dedicated mission statement, which we call our Rental Promise:

Equipment that is accurately specified, rapidly deployed and impeccably clean.

ACCURATELY SPECIFIED...

We'll ask you lots of questions....
Size? Transfer method? Doorway width?
Lift size? We want to make sure that the equipment we deliver, delivers for the user too!

RAPIDLY DEPLOYED...

Rental usually means quick delivery is required. Count on us to get the equipment there when you need it.

IMPECCABLY CLEAN...

All equipment on the Caremed rental fleet is thoroughly cleaned and disinfected upon collection/return and again before delivery.

ALWAYS SOMETHING EXTRA...

We are always adding extra value and generosity to our service, look out for our famous Therapists Support Packs, or request yours now.

RENTAL SCHEME

Rental can be a cost effective way to access equipment where there is a temporary requirement or fluctuating demand. It can also be used to access specialist equipment for a concept trial, for instance our Sertain™ seating offers the facility to provide hoist-free transfers from bed to chair - before rolling out a scheme like this, a rental offers the chance to trial with a low entry cost.

TRANSFER AIDS - RENTAL

Return Standing Device

The return stand aid with belt can create a natural pattern of movement. Perfect for rehabilitation and those with mobility problems.

- Manual handling aid - reduces the need for heavy lifting by the HCP.
- Pads in the ReTurn give the user extra stability.
- Wheels on the bottom of the device for simple manoeuvrability.
- Simple patient standing platform.
- Daily rental

SWL	150kg

SHOWERING AND TOILETING - RENTAL

Showering and toileting within the care environment is a demanding aspect of the care programme and it is essential to use equipment that promotes comfort and dignity for residents and patients. The needs of the carer are important too and our carefully selected range of products will assist in reducing manual handling and back care risks, and improving safety.

Caremed supplies a range of shower trolleys, shower chairs and commodes.

ST7700 Manual Shower Trolley

Central locking and steering castors.
Hydraulic height adjustment via a foot pedal.

Specifications

Dimensions	Width	740mm
	Length	1950mm

Lack of Capital
Funding?

Why Managed
Equipment Service
Could Be the Answer.

Understanding Managed Equipment Service

SCAN
TO
WATCH!

[or click here!](#)

What is Managed Equipment Service (MES)?

It is a smart, flexible solution for Trusts and healthcare facilities that need high-quality equipment now, but want to keep control of their budgets.

When you have high clinical need, but pressure on capital expenditure this is where MES comes into its own: reduce capital spend down to a single, fixed monthly cost and solve the age-old "maintenance problem" by building it into the same cost.

Why Choose MES?

MES allows you to spread the cost of equipment over 3-7 years rather than making a full capital purchase upfront, so even if the cost of the asset goes up, your payments do not.

Spread the cost

Acquiring capital equipment over a period of 3-to-7-year, allowing you to fix the cost of buying that asset at the beginning of the term.

Maintenance / servicing included

Maintenance can be included, eliminating uncertainty and admin and promoting longevity of the equipment. Maintenance has to be proven with a leasing option so including it in the quote is sensible.

Preserve capital funds

It allows NHS and Private healthcare trusts to upgrade or invest in additional / extra equipment without needing large capital upfront.

One single affordable monthly payment

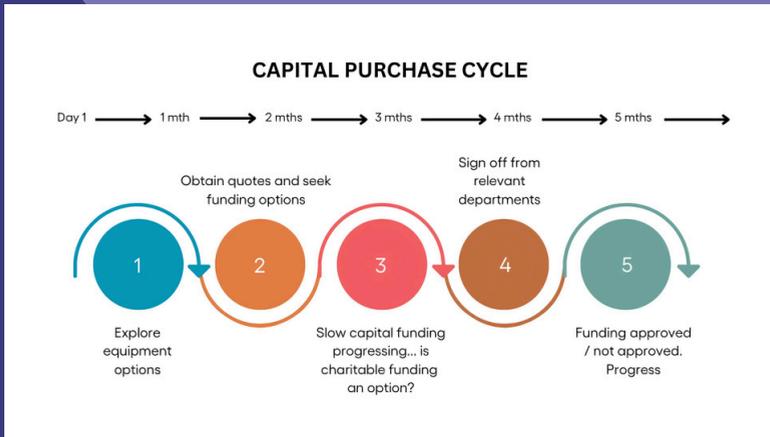

The acquisition of capital equipment can be rolled into a single affordable monthly payment.

Option to own after the lease term

After the lease term, there is the option to own the equipment (for a nominal fee, usually 1% of the lease), or options to extend the lease or to renew it for the latest equipment.

Below is a quick chart of how much time it can take to purchase a single care chair vs leasing it.

Medical Healthcare Furniture
Awarded Supplier
In partnership with NHS Supply Chain

 NHS compliant leasing solution

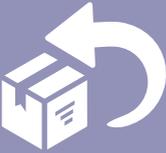

What happens after the lease term?

After a finance lease term, there are three options:

1. The lease ends and the equipment is returned.
2. The lease can be renewed at current rates, and the equipment upgraded to the latest model(s).
3. Pay a one-off fee (up to, but no more than one months rental) to keep the equipment, and all interest in the asset from the finance lease side is relinquished and you are free to do as you wish with the equipment.

Option 1

Return

Option 2

Renew/Upgrade

Option 3

Own

What about maintenance?

We have provided indicative pricing* for both maintained and non-maintained equipment, but it is a condition of the finance lease that equipment is properly and regularly maintained, and kept in good condition, so we would encourage clients to ensure suitable arrangements are in place, and records kept.

MOBILISE CHAIRS

With our Mobilise® CH5 chair, rehabilitation becomes easier, safer, and more comfortable. It offers patients comfortable transfers without hoists, potentially leading to earlier discharge and shorter stays.

Mobilise CH5 Chair

As finance rates fluctuate, the prices shown are indicative, and an accurate price can be provided at the time of leasing, though this will not be hugely different from the rates shown as we keep our illustrative rates updated.

This tilt in space recovery chair reduces manual handling strain on HCP's whilst encouraging simple early mobilisation with patients - the layflat® option allows the patient to be moved from bed to chair and then slowly mobilised.

Features

- Multi-purpose early mobilisation chair
- 100% layflat®
- Retractable legrest - fully retracts beneath the seat so easier sit to standing
- Seat tilt with Trendelenburg.
- Easily remove the seat and back cushions for cleaning
- Thick cushion base with different seating options - depending on patient
- Tough, soft touch Fortitude® material, with minimal stitching
- Strong, padded removable armrests

Specifications

SPECIALIST SEATING

Leasing agreements can include maintenance, providing clarity on who is responsible—whether it's the leasing company or the customer. This prevents the common issue seen with purchases, where maintenance responsibilities can become unclear over time, leading to equipment breakdowns and user frustration.

Including maintenance in a lease ensures reliable operation throughout the lease term.

NHS APPROVED SUPPLIER

Serving the NHS 24/7

NHS SUPPLY CHAIN APPROVED

NHS Supply Chain is a non-departmental public body of the National Health Service (NHS) in England and Wales. NHS Supply Chain is responsible for the procurement, storage and distribution of clinical consumables, capital medical equipment and products.

Caremed is listed as a supplier under NHS Supply Chain, specifically within the Medical Furniture Framework.

You can purchase all models of our medical seating under the framework reference [2024/S 000-025534](#).

Where possible, we will aim to deliver the product in 24 hours.

Here at Caremed we work in partnership with the NHS Supply Chain to provide healthcare equipment all based around our philosophy:

1

Protect the patient from discomfort and make transfers less disruptive

2

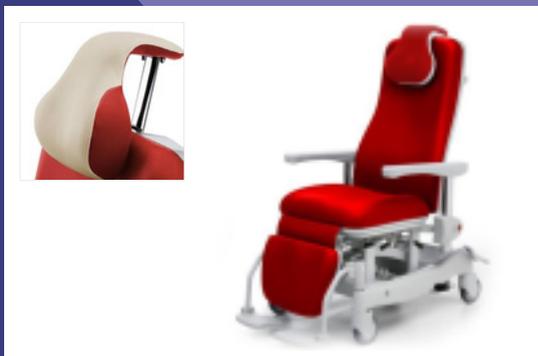

Protect the hospital staff from manual handling risks

3

Protect the organisation by providing safe, fit for purpose and well-maintained equipment

EVENTS

Here at Caremed we offer a lunch & learn for your department. These mini meetings are a chance to participate in equipment demonstrations and ask questions.

It's also a chance to discuss new product development and let us know what's happening in your department and equipment you might need...

Lunch and learns are a great way to provide teams with valuable training and development opportunities in a more informal setting. They can also help to improve morale and promote a culture of learning and collaboration.

As a thank you for taking the time to talk to us in your lunchbreak, we provide a lunch for you to enjoy whilst demos and Q&A's take place.

So if you would like to organise a lunch and learn, please get in touch.

TRADE-IN OFFER

Have you got an old Sertain™ chair that needs repairing or is it time to upgrade?

Well, we are offering a deal where you can trade in your Sertain chair and get money off a brand new Mobilise® CH5 care chair!

If you exchange a used Sertain for one of our brand new Mobilise® chairs; which are manufactured in the UK and developed by our product development team and external HCP's; we will give you some money off our Mobilise® early mobilisation care chair.

It breaks our hearts to hear of chairs condemned - we would like to rescue them and give them a new life!

Many hospitals condemn equipment and pay to have it scrapped, not realising there is still value in the piece of equipment - why not trade in a condemned piece of equipment and get some money back for it?

Here at Caremed we are offering you the chance to not only save some money on a new Mobilise® CH5 early mobilisation chair, but do your bit for the environment and recycle your old Sertain care chair with us.*

So if you would like to trade-in your old Sertain chair, please get in touch:

EQUIPMENT TRIALS

Why do we offer a 7 day trial on our Mobilise CH5 chair?

We think a trial of our equipment is a really important part of the service we offer.

A Mobilise CH5 care chair is an investment and we want to make sure that the investment is worthwhile. So here are 7 reasons why we encourage a 7 day trial...

Reduced risk.

If you're unsure if the early mobilisation chair is right for you and your department, a trial can help you to reduce the risk of making a purchase or signing a lease agreement that you might regret.

Increased confidence.

Once you've tried and tested the Mobilise CH5 care chair you're happy with it, you'll be more confident in your purchase or lease decision.

Better understanding.

A trial can help you to better understand the Mobilise CH5 and how it works for/in your department. This can be especially helpful if you're not completely sure what your department's needs are at the start of the trial.

A more informed decision.

When you have a better understanding of a product, you can make a more informed decision about whether or not to buy it. This can lead to a better outcome for both you and the seller.

Initial training to make sure you understand the chair's full potential.

A trial allows us to come in and spend 20 minutes with you and other members of your team to show you the basics of how the chair works, and answer any questions you might have. This will also help you make a more informed decision at the end of the trial

Making sure it works for you.

It's really important to both yourself and us that the chair works for you. The Mobilise CH5 was developed right here in the UK by both our product development team and input from a number of trusted HCP's – from ICU nurses to physiotherapists – and is manufactured right here in the UK.

Customer satisfaction.

HCP's who are able to try a piece of equipment before they buy it are more likely to be satisfied with their purchase. This can lead to a far more positive long term relationship with us, and allows us to make sure we are able to service and repair the chair – making sure it works to its full potential for the whole of its life.

TRAININGS

Caremed provides a range of hospital chairs and rental equipment, including the Mobilise and Sertain range of chairs. These are available for purchase or hire and full training is provided in their use and maintenance across multiple medical environments.

We've gradually built up a handy collection of training videos on our YouTube channel since we started. You'll find guides on a wide range of our healthcare equipment – from quick How-To's to in-depth demos with other popular medical equipment found in ICU, HDU and other wards.

Scan to watch our training videos on YouTube, or [click here!](#)

Support Instructions for the Mobilise Chair. Keeping compliant – How can we help you?

Safety Checks

It is recommended that the Mobilise® Layflat® Chair is given a regular safety check by a nominated person, as set out in this section of the document and that these safety checks are documented and retained.

Failure of any of the points in the suggested checks should result in the chair being taken out of service until repairs have taken place.

Annual Service and Safety Test to IEC 62353.

For details of this, please email info@care-med.co.uk

Post: Caremed UK, Unit 4a Carlyon Road, Carlyon Road Industrial Estate, Servicing & Maintenance 4.c Atherstone, CV9 1JE

Maintenance Checklist

This chair must be maintained regularly in line with the following guidelines. Failure to observe this guideline voids all warranty cover:

Daily Checklist (Carried out by User):

- Check Power Cord and Handset for Nicks or Crushing
- Handset Functions
- Brake Castor Function
- Tracking Castor Function
- Armrest Function

*For the full maintenance checklist, please refer to section 7c on page 44 of the Mobilise chair instruction manual.
