OUR PAST HISTORY

After the destructive storm of the second World War an Italian young man with his ancestor's traditional love for nature and passion for growing plants, choosed Istanbul to settle his family and share his knowledge and passion.

He worked for a period at Büyükdere Nursery and Horticulture Center which was the pride of the young Turkish Republic in the field of horticulture.

1953 was the begining of a family company that expanded his activity in Turkey and across the borders. Nowadays the 2 nd and 3th generations are actively leading the company.
