

February 4, 2020

12:00 - 1:30 pm

Offering perspectives on the water management challenges that Arizona faced in 1980 and the strategies and framework that were set in place with the passage of the Groundwater Management Act. How has the framework withstood the test of time? What lessons can we take with us to guide us in shaping the policy and strategies for the 5th Management Plans and for the Active Management Areas beyond 2025?

Engage in this interactive webinar produced in collaboration with the Arizona Department of Water Resources as we **gear up for the March 27, 2020 WRRRC Conference**. Attend via the web or join us here at the WRRRC to participate from our satellite webinar location in the Sol Resnick Conference Room.

Carol Ward is Deputy Assistant Director, Planning & Permitting, Arizona Department of Water Resources. Among her responsibilities is the coordination of the Governor's Water Augmentation, Innovation, and Conservation Council and its committees. Before coming to the Department, Carol served as Assistant Director of the Arizona Municipal Water Users Association, a non-profit association in the Phoenix area dedicated to protecting its members' ability to provide assured, safe, and sustainable water supplies.

Natalie Mast is the Program Manager responsible for Active Management Areas Management Plans at the Arizona Department of Water Resources. Natalie and her team are currently working to complete 4th Management Plans for the Phoenix, Pinal, and Santa Cruz AMAs and are concurrently leading a work group and stakeholder process for the development of the mandatory conservation programs for the 5th Management Plans.
