

RESPONSE TO ARTICLES

Leif Bergman (#1109) of Lidingö, Sweden, provides the following information in response to articles in the Bulletin: Still more information about Faroese Perfins is published in the latest Posthistorisk Tidskrift, Number 2-3, 1976. There was another Perfin used besides V.L. Det Danske Petroleum's Aktieselskab had a branch office there which used the same Perfin as the Copenhagen office, D.D.P.A. (Figure 1). As far as I know, you can only see the difference if you have a postmark where you read the origin.

Jack Brandt asks for more countries with number Perfins. Enclosed are copies of what I have, which are from Sweden, England, Fiji, Hong Kong, Jamaica and South Africa. These are not Perfins, as Jack also knows (editor's note: Brandt's comments appeared in the July/August 1976 Bulletin, in which he pointed out that the numeral Perfins were from address labels attached to films sent in for processing).
