I N T R O D U C T I O N

After three years of research, I am presenting to Perfin collectors a catalog of Czechoslovak Perfins. It contains about 750 different dies and, according to my estimate, the listing is 85 to 90 percent complete. I think it is useful to publish a fairly comprehensive list of the Perfins of a given country to enable other collectors to add newly discovered items to it.

Several remarks are required to explain special problems concerning the collecting of Czechoslovak Perfins.

Czechoslovakia was founded as an independent republic at the end of World War I, on October 28, 1918. Before this date, the Czech lands (Bohemia and Moravia) were a part of the Austrian Empire, and Slovakia was under Hungarian domination.

Since Perfins had been introduced to the Austro-Hungarian Empire in the late 1870's, we see Perfins of firms residing in the Czech lands or in Slovakia on Austrian or Hungarian stamps, respectively, from 1870 to 1918. In most cases, the same dies were used after Independence on the new Czechoslovak stamps.

Because of political developments, Czechoslovakia lost part of its territory - the so-called Sudetenland - in October, 1938. Therefore, some of the Perfins used by the firms residing in that part of the country appeared on German stamps - mostly on the then-current Hindenburg types. Parts of Slovakia were occupied by Hungary, and again Perfins of Czechoslovak firms were applied to Hungarian stamps of the types used in the late 1930's.

Then, on March 15, 1939, the rest of Czechoslovakia was annexed by Germany. A Protectorate of Bohemia & Moravia was set up in the already mutilated Czech lands and a puppet state of Slovakia in the remaining Slovak territory.

Some 50 firms continued to use Perfins during World War II and they can be found on stamps of Bohemia and Moravia, and Slovakia.

On May 9, 1945, the Czechoslovak Republic was restored and again started issuing its own stamps. About thirty firms continued to use old Perfins; at least two companies introduced new designs.

The use of Perfins in Czechoslovakia was never prohibited, but after 1950, the firms gradually ceased using Perfins and began switching to metered mail. Only one enterprise, the Orbis Publishing House, is still using Perfins (see Perfins Bulletin #234).

This complicated history explains why this catalog of Czechoslovak Perfins is

called Perfins from the Territory of Czechoslovakia.

In a special column, code letters indicate on which nation's stamps a particular Perfin pattern is known to exist.

The following code is used :

A = Austria	BM = Bohemia and
H = Hungary	Moravia
C = Czechoslovakia	S = Slovakia
(1918-1939)	Cp = Post-war
G = Germany	Czechoslovakia

A straightforward collection of Czechoslovak Perfins may contain one copy of each pattern, regardless of which nation's stamps it is used on. A more specialised collection will include each pattern on a stamp from each known issuing country. For example, Perfin A.D. (catalog number A-9) can be shown on the stamps of Austria, pre-war Czechoslovakia, Bohemia and Moravia, and post-war Czechoslovakia.

In this catalog I have also given a very brief description of the scope of the activities of known Perfin users (about 270). The following abbreviations are used:

B = Business
M = Manufacturing
W = Wholesale trade

I believe this to be very useful information which can add to the interest of Perfin collecting.

The illustrations are copied by hand from original Perfined stamps. There is no set position of any Perfin since the size of both Austrian and Czechoslovak stamps changed frequently and the stamps were put in the perforators quite haphazardly. I also do not give the number of holes or their measurements in millimeters as I think it is much easier to match a Perfin with a drawn die than to count holes and measure them. A magnifying glass will be found very useful for this purpose.

I would like to express my gratitude to all the officers of the Perfins Club for the help and encouragement which made the publication of this catalog possible.

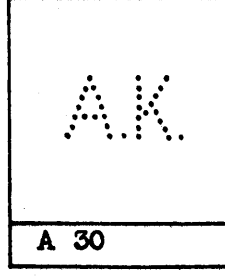

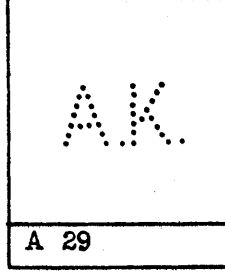

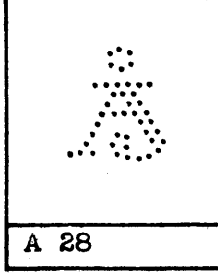

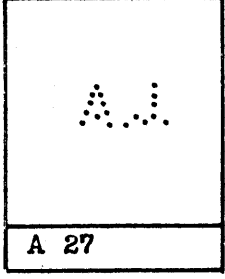

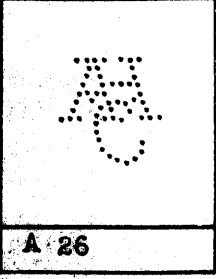

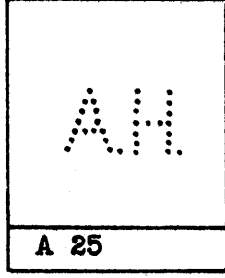

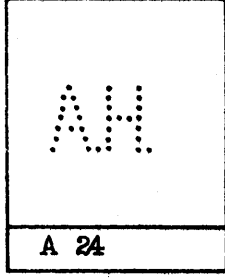

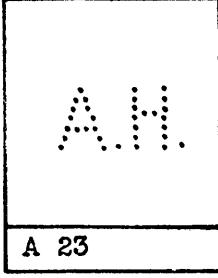

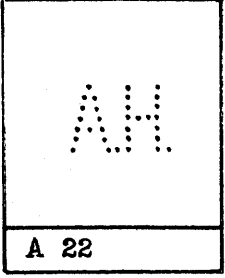

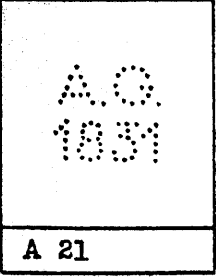

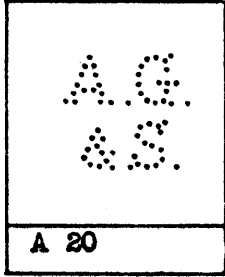

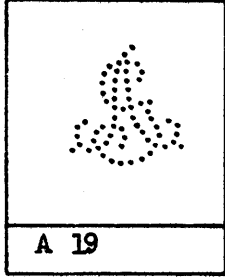

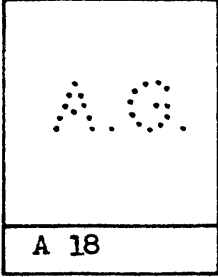

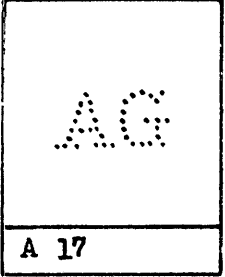

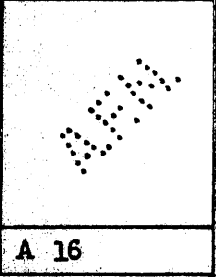

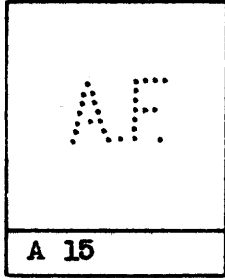

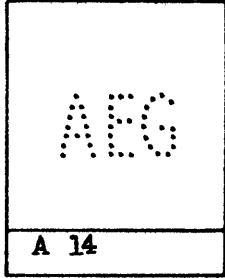

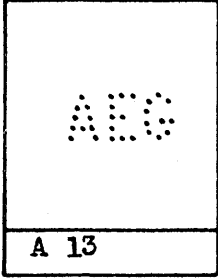

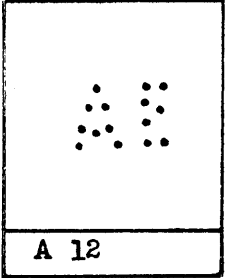

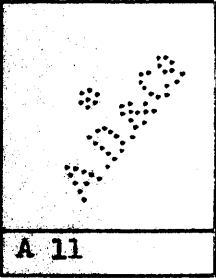

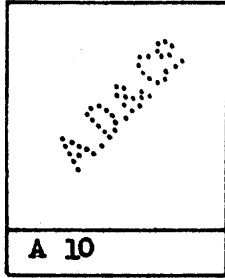

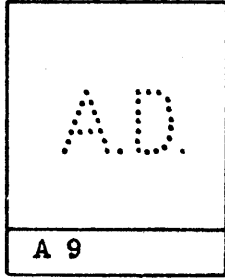

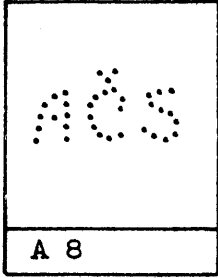

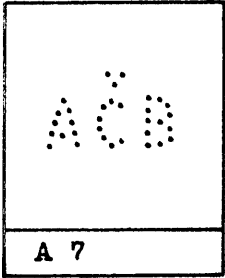

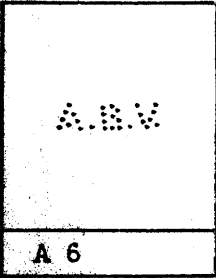

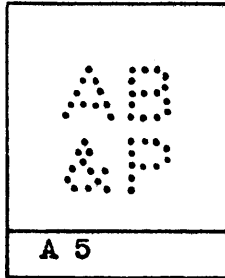

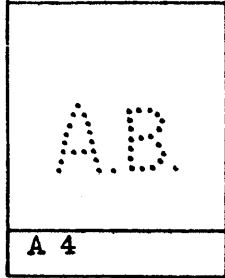

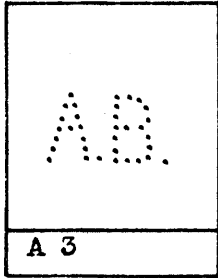

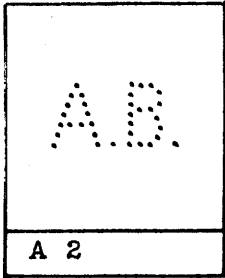

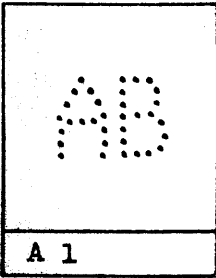

Finally, I wish to convey my warm thanks to stamp collectors in Czechoslovakia and abroad - mainly in the USA, Canada, the Netherlands, Poland and the German Federal Republic - who helped me by supplying Perfined stamps and identification items. This cooperation speeded the completion of this work.

I will welcome any suggestions, addenda or corrections from any collector who uses this catalog.

1st Supplement to the Catalog of the Perfins from the Czechoslovak Territory

This Supplement contains 59 new Perfin-dies, 18 additional Identifications and few other information.

Two collectors pointed out that certain dies in the Catalog show only little divergence. This is true but all the Perfins can be distinguished as separate items. By unfortunate mistake Perfins A 44 and A 45 have the same pattern ; a correct drawing of the die A 44 is therefore provided.

Most difficult are Perfins A 22 and A 24 (A.H.) . The letter A of A 24 is in reality 0,2 millimeters taller than that of A 22 but the difference cannot be reproduced and becomes apparent only when both Perfins are superimposed. The text of the postmarks can be helpful too ; Ústí nad Labem (Aussig) for A 22 and Broumov for A 24. The difference between Perfins A 29 and A 30 (A.K.) is more marked and again the postmarks should help.

Some F.P. Perfins - F 38, F 39 and F 40 - look alike ; the position of the full-stops helps to distinguish them . Perfins F.S. can be confusing too ; F 47 is a little taller than F 46 and minute details differ on Perfins F 48, F 49, F 50 and F 51 ; probably they all belong to a Firm using a multiple-head perforator.

Slight variations in the shape of the letter J help to sort J.K. Perfins - J 39, J 40, J 41 and J 42. The position of the top-left hole helps to separate Perfins P 3 and P 27. Perfins P 22 and P 23 (PVV) vary by the size of the holes only. Finally Perfins T 9 and T 10 (T.S.) seem to come from a twin-head perforator used by a Textile Company having head-office at Praha and works at Krnov.
