27th October 1977

Dear Mr Birch,

Thank you for your letter concerning perforators.

We do manufacture a small number of these machines suitable for postage stamp perforation. The normally have a perforated design enclosed within  $\frac{1}{2} \times \frac{1}{2}$  area. Lately all orders for these machines have come from U.S.A.

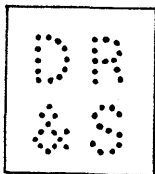

I enclose a sheet from our brochure showing the type of machine we produce.

Please contact me if you have any more queries.

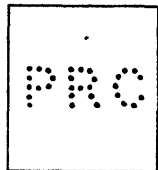

Yours faithfully,

Baddeley Brothers London Ltd.

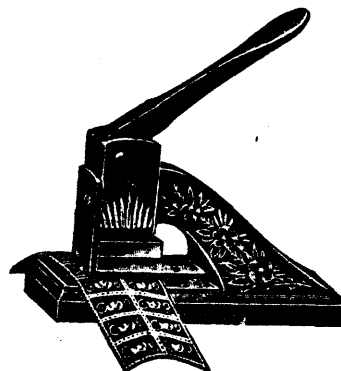

# B.B. POSTAGE STAMP PERFORATOR

LP 2201

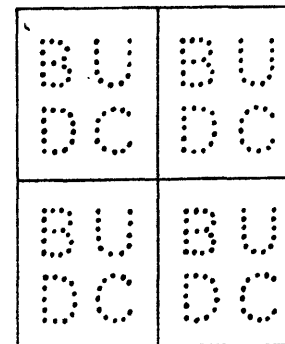

LP 2202

No. 1 B.B. Postage Stamp Perforator

Base size 5½" x 2½" Weight 3½ lbs.

Finish: Black Ripple

LP 2204

This perforator is used by business houses to protect postage and insurance stamps against pilfering.

It can be supplied with ONE die to perforate 2, 3 or 4 initials on each stamp, or

With TWO dies, which will perforate 4 stamps (2 sheets thick), or

With FOUR dies to perforate 8 stamps (2 sheets thick). No more than 2 thicknesses should be perforated at a time, and before and after use the pins should be lubricated by perforating a sheet of paper on which sewing machine or other light oil has been spread.

The following shows the appropriate sizes of presses for various sizes of perforating dies.

- No. 1. 1-on die of 2, 3 or 4 letters or figures.
- No. 2. 2-on die side by side, up to 5 letters per square x 2.
- No. 3. 4-on die, up to 3 letters per square x 4.
- No. 4. 4-on die, up to 5 letters per square x 4.

(see separate price list)
