

**PERFINS IN CURRENT USE** Derek Ransom.

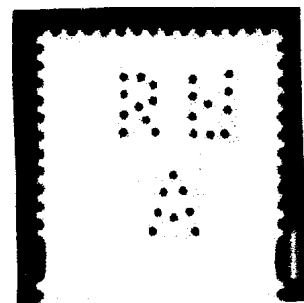

Thanks to Messrs Steere, Strange and Donovan, plus myself, for the following information.

**Additions to the "Modern" Perfins Listing.**

C3085.03	C/HA	20b
D4710.01M	DT	25b
H1160.02M	HC	1 <sup>st</sup> a
J6320.01m	JPII/XX	private
L4030.02	LB/H	2 <sup>nd</sup> a
M8020.05M	MB/W	2 <sup>nd</sup> a
M2755.05M	MGN	25b
R1410.01M	RBC	1 <sup>st</sup> M (add to 21st Century list)
R2224.01	RH/A	2 <sup>nd</sup> (extra pin)

Further to the last entry above,  
from **Stephen Steere:-**

I have discovered a Machin 2nd class stamp  
perfin RH/A but with an additional pin in the H.

(Not to scale)

It would appear that this is die PL/A (P2880.01M) adapted for the RH/A die, but as yet I have no proof. (Derek does not agree with this theory - so watch this space!) Roy has allocated it a catalogue number of R2224.01. However this is the only example reported to date, so can members please check their holdings of this die. If you find a match please report on what issue and value together with any postmark information. I am sure that Derek Ransom would also appreciate details for his list of modern dies being used with perfin.
