Auction No.2 (1997) 12 pages.

UK members should receive a membership card for the Association of British Philatelic Societies with this Bulletin. Please sign it in the space provided. It is hoped eventually that holders will be able to get free entrances and discounts. Thanks again to member John Luft, who posts the Bulletins, for doing this chore.

CARDNET SYSTEM (Lloyds Visa).

I have the information on payment by CARDNET, which is Lloyds Bank version of VISA or MASTERCARD. There is a joining fee of £125, which the Society can well afford. The members will be charged commission of 5% on each transaction, so long as the total commission from our account is £200 per year. I see no problem with this. Auction 7 was typical where over £1000 worth of lots went to the US and Canada, representing £50 of commission.

Obviously this is of most use for members in the US as it enables you to pay your accounts for the auction etc without having to worry about getting sterling checks or converting what you owe to \$'s, sending \$ bills, or getting \$ checks. Most of our UK members will find it cheaper to pay as they do at present. European members will find it cheaper than EUROCHEQUES or GIRO. (GIRO transactions are usually charged at £5)

Apparently for all amounts over £25 I will need to check with the bank that your account has the money to pay the bill. Obviously you must have the chance to examine your purchases and return any that are not as described, but I understand card payment has this facility built in. The system will work by post and telephone. I will not be able to take card payment in person.

At present that is all I know. Providing I hear from enough overseas members that they will use the system, I will go ahead and make the arrangements and furnish you with further details.

"RUBY" ANNIVERSARY!

Reading through some very old Bulletins I noted Michael writing about the first meeting of the Perfin Study Group, as we were then, at "The Swan and Sugarloaf in the City of London on 18/11/57. So this November we will be 40 years young!

SECRETARY'S COMMENTS Dave Hill

I have come across two references to perfin in books I have read recently.

Firstly I was surprised to see Slopers offices in the background of a photo of a street procession. The book was "From Palm to Pine, Rudyard Kipling at Home and Abroad" by M Laski, published by Sidgewick and Jackson. The photo is of a Sikh detachment at Queen Victoria's Diamond Jubilee procession at the corner of King William Street. The photo was being linked to some of Kipling's military verse.

The street is lined with soldiers and cheering crowds and people are hanging out of the windows above Slopers. Typical of Slopers opportunism, there is a large sign outside Slopers, advertising his services. The photo came from the BBC Hulton Picture Library and there is possibly a whole series of photos of this procession taken from the same vantage point. What free publicity for Sloper.

This particular photograph is the same one which the Society obtained from Slopers when the works were closing. It is blown up to 9½"x11", is sepia in colour and is framed and behind glass. No doubt it was hung in the Directors' room.

Secondly, in a book of the history of Her Majesty's Stationery Office, we are told that ballot paper perforating machines were first used in 1924. For two years previous to this, stamping machines had been used for the same purposes but presumably it was thought they could be forged. When you vote, you give your name and address and are given a ballot paper after the clerk has perforated it. You then vote in the booth and drop the paper into the ballot box. Presumably any unperforated papers could be rejected. I have been a poll clerk and am sure I forgot to perforate the occasional paper when we had a rush but I never heard any more. Each polling station has the removable pins of their machine in a different pattern (usually there are 8 by 8 pins making 64 maximum). Rosemary Smith, Kevin Parkhill and a few other members have ballot machines in which they have arranged the pins to give a personal perfin.

* * *

Roy Gault agrees with me that there may be a few GB perfins which are also known on foreign stamps. This may have been done

genuinely or by favour. There are instances of identical machines being made for GB and abroad at the same time. It would be useful if Roy could be told of any of these instances before he does the New Illustrated, so if you have the old Edwards/Gault silhouettes catalogue and a foreign perfin catalogue perhaps you could compare them. Failing this if you have a foreign catalogue and are getting the New Illustrated, perhaps you could compare each letter as it comes out. There may be a clue to the user of a GB perfin in a foreign catalogue. The Canadian and Dutch catalogues have already been checked.

In the same vein, the POKO machine was international, and was used by some international companies. Roy has a new catalogue coming out soon of the GB perfins that were used in affixing machines like the POKO. Other countries also have catalogues/lists of POKOs. Has any member ever put together an international listing? It would be particularly interesting if there were cases of a machine being taken from one country to another. I think second-hand machines were sometimes refurbished for a new user. Again there may be clues to GB perfins in a foreign listing of POKOs. POKOs are becoming a very popular collecting theme.

NON-PHILATELIC PERFINS Rosemary Smith

I think it was June 1994 when I last published one of these 'non-perfin' items. Today I have two for you.

1. TERENCE WOOD has sent the original booklet for rail travel through Germany. The front and back are perforated LONDRES A.G. (curved) and the date 29.6.36. On each page the regulations are printed in German, English and French. The tickets inside were valid for one week and the used stubs show travel through Bonn, Koln, Koblenz, St Goarshausen, Rhudesheim, Wiesbaden, Mainz, Frankfurt, Nurnberg, Aachen Sud Grenze, and there were 3 stubs too torn away to read the town name. Is this the original "Whistle-Stop Tour"?

2. In some previous Bulletins I printed the Library perforation on the inside fly leaf of some books. I assume these perforations were to prevent the books being stolen, much like the security intention of perforating postage stamps. I had vowed not to print any more as 'enough is enough'. However, this item, sent by JACK

NEW YORK

E. P. DUTTON & COMPANY,

681 FIFTH AVENUE

BRANDT tickled my sense of humour - near the surface for most of my life!

The perforation reads, "MECHANICS INSTITUTE MONTREAL" but it was the title of the book which caught my eye - "THE LUNATIC IN CHARGE". When it gets near the time for the Bulletin to go to the printer and I am frantically deciding what to include, what to leave out, juggling to get pages in the right order so that illustrations face the text page and putting correctly numbered footers on each page, I feel like THE LUNATIC IN CHARGE.

LONDON SOUTH WESTERN & LONDON BRIGHTON and SOUTH COAST RAILWAYS

By John Button

In 1859 The LSWR completed the line from London to Portsmouth via Guildford. At Havant the line joined the Brighton to Portsmouth railway owned by the LBSCR which had been completed twelve years earlier. Up until the railway groupings the LSWR had running powers over the LBSCR line from Havant to Farlington. From Farlington to Portsmouth the line became joint property so perhaps the illustrated trade card was not unusual.

This card is the LSWR official form numbered 486 but bears a QV ½d green Jubilee stamp with perfin L0690.03 - LB/SC - used from Fratton on the joint section of the line.

COMPANY HISTORY REFERENCE BOOKS

After the plea in the last Bulletin for names of reference books, from MIKE BAVIN comes this rather impressive list.

1. Brief history of Titus Salt (pp 25/26) "Life during The Industrial Revolution" - (Reader's Digest Assoc' Ltd., 1995)
2. A History of the Modern Chemical Industry by Hardie-Pratt. (Pergamon, 1996)
3. "Yes We Have Some, The Story of Fyffes" by Beaver. (Publications for Companies, 1976) inc. United Fruit Co. – which perforated Jamaican stamps: but British??
4. "Realms of Silver" by Compton MacKenzie (Routledge & Keegan Paul, 1954) - Chartered Bank of India, Australia and China.
5. "One Hundred Years of Banking in Asia & Africa. National & Grindlays Bank Ltd. 1863-1963" by Tyson. (Pub. by the Bank, 1963)

6. "The Century of the Sun" by Schull (MacMillan of Canada, 1971)
Sunlife of Canada - a common Canadian perfin.
7. "Baring Bros & Co. Ltd. - A History to 1939" by Orbell
(Published by Baring Brothers, 1985)
8. "Cook's Tours, The Story of Popular Travel" by Swinglehurst
(Blandford, 1982)
9. "Fifty Years of Unilever, 1930-80" by Reader (Heinman, 1980)
10. "Esto Perpetua Norwich Union Life Ins. Co." by Blake.
(Neame, Norwich, 1958)
11. "The Sun Insurance Office, 1710-1960" by Dickson. (OUP, 1960)
12. "The Merchant Bankers" by Wechsberg (Weidenfeld & Nicholson,
1967). Inc. Hambros, Barings, Warburg, Mattison, Abs, Lehman,
Rothschilds.
13. "The Thomas Cook Story" by Pudney (Joseph, 1953)
14. "The History of Baker Perkins" by Muir (Heffer, 1968)
15. "A Hundred Years of Joint Stock Banking" by Crick & Wadsworth
(Hodder & Stoughton, 1936)
16. "Harrods, The Store and The Legend" by Date (Pan, 1981)
17. "One Hundred Years of Good Company" by Newman (Ruston and
Hornsby, Lincoln, 1957)
18. "The Story of the Britannia Iron Works, Wm. Marshall Sons & Co.
Gainsborough" by Lane (Quilter, 1992) and "The Book of
Gainsborough" by Beckwith (Baracuda, 1988)
19. "Grantham, A Pictorial History" by Knapp (Phillimore, 1990)

On the same subject of reference books, DAVE HILL sent me a catalogue of "Rare, Scarce and Secondhand BRITISH DIRECTORIES and Other Related Books". It is of List 21 from RAY SPARKES (Books), The Grange, Woodhouses, Yoxall, Staffordshire DE13 8NP Tel:01543 472274.

There are 40 pages of directories etc dating from 1795 to the 1960's. The books are categorised into counties and prices range from £5 to £250. The majority seem to be £30-£50. The catalogue makes good reading. The two books that took my fancy are priced in the £125 bracket!

Dave Hill has The Butterworth Dictionary of Business Biography, which he finds very useful for data on perfin users.

EDITOR'S COMMENTS March 15th Rosemary Smith

First I must apologise for the February Bulletin being even later than I had expected. With only about four hours more work to be done to complete the edition, I went down with the 'flu' virus, which hit the country. It took me a week to finish those four hours of work and I have a special word of thanks to Michael Rucklidge and John Luft who pulled out all the stops to get the Bulletin printed and in the post once I had completed the master.

There are so many contributions this month that I am leaving my next chapter on Perforated Postal Stationery until June. It is nice to see new names in the Bulletin.

There are 8 pages of New Identities. They are printed in such a way that they can be pulled out and added in two separate sheets to your existing file - if you do pull them out and file!!

NEWS OF MEMBERS

Recent medal winners in the field of philately, albeit not for perfins, have been JOHN MARRINER and MIKE OXLEY.

MEMBERS' COMMENTS ON PREVIOUS ARTICLES

What Is It? Bulletin 284/12; 286/22.

JOHN MATHEWS sends a photocopy of a similar item to that in Bulletin 286. John has the full strip of 12 but I have only illustrated half so that they can be shown full size.

The perfin is LYON/&/HALL (L6065.02) and is on the "gutter" from between panes with each segment having a perfin. Tomkins says this pattern is only known on KGV Downey Heads. The colour of the shaded bars is brownish-red. On each end, the selvedge extends down 3 rows but is not perforated.

John cannot think why anyone would perforate the gutter unless it was a multiple head in a vertical arrangement - the 12 strikes across have not all been done at one time.

Missing Pins - G(de) Perfin Bulletin 285/9.

PETER MAYBURY has a 1d lilac with the G(de) die which fits into the gap mentioned by Jack Brandt. The stamp is dated 31 May 1900. The relevant pin is present but very blunt.

Peter wonders if it was then deliberately removed as it could be interfering with the process of perforating the stamps - i.e. the stamps were not released cleanly from that pin.

PERFINS STILL IN CURRENT USE George Dyke.

DEREK RANSOM has, once again, found quite a number to add to the list.

<u>PERFIN</u>	<u>CAT.NO.</u>	<u>STAMP</u>	<u>USER WHERE KNOWN</u>

In Derek's own words, "the following are some useless statistics".

Out of approx 100 kilos of genuine kiloware a rough content will produce a perfin (approx):-

for Wildings	1 in every 20
early Machins	1 in every 100
later Machins	1 in every 500
elliptical	1 in every 1500

Not such useless information!

The full list is still contained on 2 sides of A4 paper. I, Ed, have them on computer and if you would like a print-out and have to write to me re the Bulletin, please mention the fact. I believe Dave Hill also keeps a copy on his computer. This is another on going piece of research and needs your input.

"Lost" Perfins Dave Hill.

Looking through back copies of the early Perfin Society Bulletins there are two perfins mentioned which have never been illustrated. They are WILKS/BROS and NIGHT/MAIL.

Roy is unable to include these in the new catalogues because of lack of details. If any member has either of these perfins, please report, with photocopy or actual stamp, to Roy Gault.

Many members of the Society came to know Arthur Smith either through personal contact at the London meetings or through correspondence. He distributed his duplicate perfins to all and sundry and felt happy to help any fellow collector in this way.

I first met Arthur in London and then corresponded regularly - not only about perfins but on a wide ranging number of subjects. Arthur was interested in everything.

The following article was the last long piece I had from him and its content sums up his observations and interest in everything he saw. As many of you will have noticed over the years, he was a frequent contributor to the Bulletin (and to the new catalogue where his input into the worksheets will be greatly missed by Roy).

Rhodesia Perfins Bulletin 282 Page 7. By Arthur Smith.

Reading the comments by John Nelson in his reference to the c.d.s. of Native D--- Umtali, unforgettable memories came to mind. I was on my last overseas posting in 1952 and stationed in Kumalo near Bulawayo. Being a spare time entomologist and visiting the museum in Bulawayo, the curator advised me to try and get a trip to the Vumba Mountains where butterflies and other insects were to be found in all colours and sizes. The result was the crew of our old warhorse aircraft, a Decota, agreed to take me up to Umtali on a training flight. This came to pass as it were, and after a drink in a hotel, which reminded me of the American Wild West, the lads said 'get moving', which I did. The only transport was a very old lorry cum bus going to Chapinga, and was just about full of locals and their belongings. We arrived safely and I booked into the small hotel.

Talking generally in the bar I was approached by a chap who said "you ought to go up Mt Salinda - wait a minute and I'll try and fix it". On his return I was told that I would be welcome to stay with the Tsetse Fly Ranger and his family. A trip had been arranged to take me up the mountain track and the start of wonderful experiences began. Looking back now I regret that I had never heard the word PERFIN.

Regarding the c.d.s. mentioned I would hate to suggest a word

for the D--- but can confirm UMTALI did and does exist. I also have a mint 1/- stamp of B.S.A. overprinted RHODESIA with the BSA/C perfin.

Checking my small holding of Rhodesian perfins I find I also have an 'LL' perfin on a KGV ½d and an 'HSS' perfin on the first issue 1d with postmark BULAWAYO. My other British South Africa Company stamps have date perfins and therefore were used in the revenue field.

* * *

Arthur knew that I had intended editing this down to the data on the Rhodesian perfins. With his death I find it very apt to print the whole of the article as he wrote it because it brings him so clearly to mind. I know I am not the only person in the Society who received such graphic accounts from his pen.

Our sympathy and best wishes go to his wife, Olive.

WANTS

Non-member RAMESHWARBAS BINANI

is looking for perfined stamps connected to a flag theme.

Secondary thematic interests are perfined stamps on themes of Cinema, Maps, Butterflies, Olympics and Cycles. He can exchange for perfins of India on cover and loose GB.

Anyone with a collection of Railway Perfins might consider adding a sub-section (if they haven't done so already) of perfins franked with the marks of Travelling Post Offices (TPOs), Sorting Carriages and the like. Mails have been carried by rail from the very early days of railway travel, for example the first "all- rail" mail from London to Sheffield took place on 16th June 1840 - coincidentally around the time of the introduction of the "Penny Post". Eventually, mail would not only be sorted "en-route" but would also be picked up and dropped off automatically at speed.

The illustrations of the cancellations in this article are based on those used by H S Wilson in his "History of the Travelling Post Offices of Great Britain". Published in three parts, this work is a must for 'TPO Cancel' enthusiasts.

While inspecting material for the "New Illustrated Catalogue" I came across four such cancellations. One was the frequently encountered cancel of the "Glasgow & Carlisle Sorting Tender", but the other three I thought were unusual and worthy of note. The euphoria, however, was short lived as Tony Cornforth pointed out that there are over 1,000 such cancellations, with dated marks appearing from around 1869 - coincidentally from around the time of Sloper's introduction of 'perforated postage stamps'.

1895-1900

R0487.03

Thirty-one different cancellations are known for the various Glasgow & Carlisle Sorting Tenders, Carriages & TPOs, some of which were combined with the Glasgow Duplex '159'. The example noted on RB/G (R0487.03) and dated 28 Oct 1897 is typical of the late Victorian era having been introduced in April 1892.

1895-1895

R5243.02

Still in existence today is the "Midland T.P.O" running between Bristol and Newcastle, but it began life way back in 1845 as the "Rugby & Newcastle R.P.O". Twenty-five cancels are recorded by H S Wilson,, one of which was issued in May 1880 and matches that noted on RT/&C°. (R5243.02) and dated 27 June 1893.

1895-1953

R4770.01M

The "Ipswich Sorting Tender", established in 1872, transported mails to/from (i.e. UP/DOWN) London. The cancel found on R.S/&J (R4770.01M) dated 11 Nov 1903 is known used between 1903-1907. The service ceased in 1929 when it was transferred to Norwich.

1885-1910

R2800.03

Finally, this "Grimsby & Peterborough Sorting Carriage" cancel was found on a pair of King Edward VII Id's, dated 27 June 1907. Although the roster was introduced on 1st April 1900, this particular cancel was first used in 1905. Unfortunately, it became damaged/lost and was replaced in 1910 by one with taller letters. The service was discontinued at the end of March 1917.

SCANNERS HELP SORT THE WOOD FROM THE TREES Roy Gault

I believe it is worth commenting that the effectiveness of current Perfin Catalogues and Bulletin articles owe a great deal to modern technology - computers, laser printers, photocopiers and the like. To this armoury can now be added the colour scanner, a machine very similar to a photocopier except the information is stored on a computer disk ready for retrieval at a moments notice. But how can we use a scanner to help with our hobby? I have three answers, as follows:

1. Preparation of coloured artwork for catalogue covers and exhibition pieces.
2. Scanning backs of perfinned stamps to provide illustrations instead of by photocopying.
3. Scanning fronts of stamps.

Item '3' seems at first glance to be the least helpful so I have expanded upon it here. Once the front of the stamp has been colour scanned into the computer, the colour palette can then be edited to alter all colours (except black) to become white. The result is a 'revealing' of whatever is black - the postmark on a postally used stamp, or possibly an overprint on a receipt stamp.

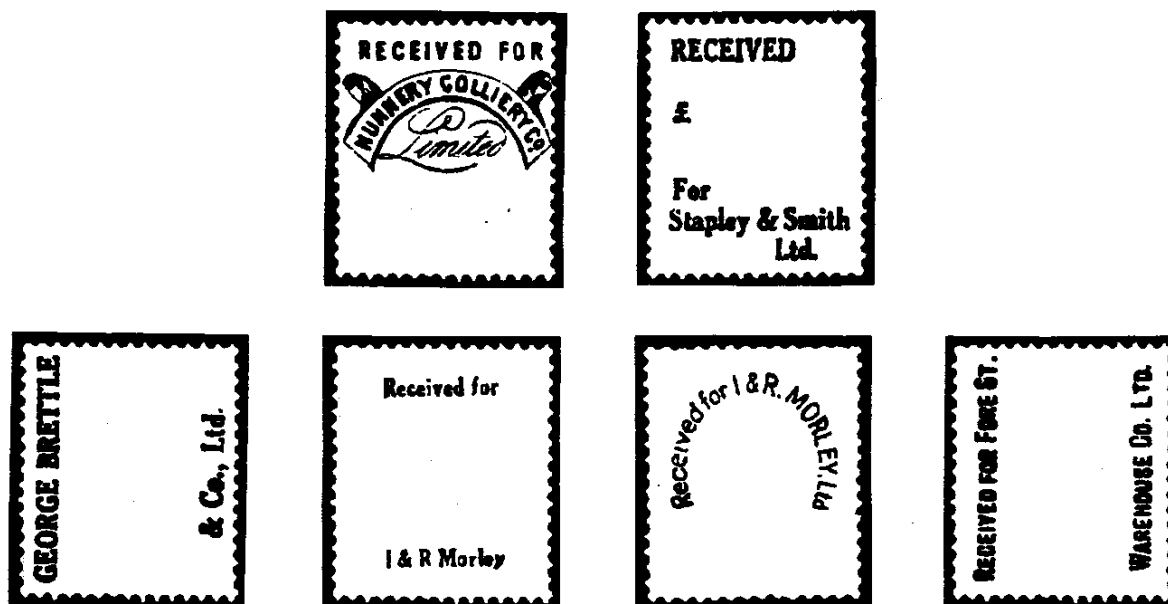

The illustrations above show an ordinary photocopy of a Queen Victoria 2½d Jubilee with a T.P.O postmark (featured in the 'T.P.O' Bulletin article), along with the postmark as 'lifted' by colour palette editing. Inevitably, if the postmark is smudged, as in this case, the resulting illustration will also be smudged, although it can be 'tidied-up' by further editing. Also, by placing the stamp on a small piece of white paper the holes of the perfin have been made to 'disappear'.

A more impressive result can be seen when the scanner is used on overprinted stamps. The following illustrations have all been scanned in from my meagre collection of commercial overprints a collection so small that almost every one has been illustrated! The top group occur on a mixture of Queen Victoria Inland Revenue 1d's and 1d Lilacs.

1875 - 1895

1925 - 1935

The final group are all on King George V 2d typographs, some of which have stamped dates from the early 1930's. The 'indelible' mauve date stamps have been removed by colour palette editing.

NEW IDENTITIES submitted to the CATALOGUE EDITOR (Roy Gault) -11 Contributors.

Note: Underlined Catalogue Numbers are also New Dies and have been illustrated at the end.

From Maurice Harp. Suspected identities on 1d Reds supported by period Trade Directory entries.

B3380.01 BH&H 15,11,14,11 4½ III Ø Beddoe, Hulbert & Hulbert,
Trimming Mfrs & Warehousemen,
126/7 Wood St and 5½ Gutter Ln,
London EC. A

Note: Identity suspected from the unusual letter combination and loose stamps postmarked London. Based on known plate numbers (between 140 and 206), the die was probably in use 1870-1877.

C7040.01 C.S/&H 8,10/14,12 5 III Ø Curwen, Sons & Harman,
Flannel Mfrs & Warehousemen,
23 Wood St, London EC. A

Note: Identity suspected from the unusual letter combination and loose stamps postmarked London. Known plate numbers (134-215) indicate the die was used 1870-1878.

D0890.01 D&C^o/F.L 10,14,8,6/8,7 4 I Ø Davies & Co, Newsvendors,
Advertisement Agents, Foreign &
English Booksellers, Music Sellers,
1 Finch Lane, Cornhill, EC. A

Note: Identity suspected from the unusual letter combination and loose stamps postmarked London and D30, D31, D42, D46, D51, D52, D53, D55. Known plate numbers (100-129) indicate an early die used c1870. Prior to 1887, numbers D27 to D56 and D60 to D65 are believed to have been used in the London Chief Office to cancel stamps on newspapers and printed matter.

H1640.01 H&C^o/2.C.S 12,14,8,6/10,8,4 4½ III Ø Horstman & Co, Merchants,
2 Crosby Sq, London. A

Note: Identity suspected from the unusual letter combination and loose stamps postmarked London. Known plate numbers (109-192) indicate a die usage of 1870-1877, although the company continued to trade until the late 1920's. Probably the user of H&Co./2.C.Sq (H1650.01) rather than Handyman & Co as listed in Tomkins.

H2295.01 H.E./&C^o. 11,10/14,8,6 4½ III Ø Henry Russell Evans (& Co),
Merchants & Financiers,
52 Lombard St, London EC. A

Note: Identity suspected from loose stamps postmarked Lombard St, London. Known plate numbers (146-222) indicate a die usage of 1871-1879.

J6140.01 J.P/G^kS^t 7,9/10,9,10,6 4½ Ø John Miles Pitman, Gold & Silver
Leaf Mfrs, 2 Greek St, Soho,
London W. A

Note: Identity suspected from the unusual letter combination and loose stamps postmarked London W. Based on known plate numbers (124-184), the die was probably in use 1870-1877, although the company continued to trade until the late 1880's.

T4840.01 T. V/&/SONS 7,9/14/10,10,13 4 I Ø Thomas Venables & Sons Ltd,
Carpets, Furniture & Drapery,
102-105 Whitechapel, London E.
Also 2-12, 29 Commercial St, EC. A

Note: Identity suspected from the unusual letter combination and loose stamps postmarked London E. The known plate numbers (119-220) indicate a usage of 1870-1879.

W3440.01 W&H 10,12,9 5 IIIa Ø Walker & Hall, Silversmiths,
Howard St/Eyre St, Sheffield. A

Note: Identity suspected from loose stamps postmarked duplex '700' (Sheffield). Known plate numbers (174-223) indicate a use 1875-1879. Their advertising material shows 'W&H' on a pennant as their trademark.
