

Two New Identifications

Atholl S. Glass (#2840)

The previous single user reported for Schermack perfin #72 (34678) was Babson Brothers of Chicago. Interestingly, Babson, Burlington Watch Company and the Insurance and Fidelity Company have

previously been identified as using perfin #15 (37). The fact that the #72 reported covers are all of a latter date than the #37's would seem to add evidence to the broken pin theory. Also, the fact that all three user companies were located close to each other on 19th. street in Chicago, but were in different businesses, might indicate the use of a mailing service (perhaps offered by a printer in their area).
