PAC Perfins.

Bulletins 241 & 242.

At the recent visit to Slopers' works, ROY GAULT persuaded Mr.Cockayne to give him an impression of the current 10 head PAC die. This answers the question of: how many dies there were on this multi-headed machine; who perforates the Pru perfins; the exact variations to look for.

Although the illustrations are in 2 rows of 5, the multi headed machine perforates a continuous row of 10 dies - as the numbers.
