## SLOPER TESTIMONIAL - 1894 Maurice Harp

Amongst the documents that the Society obtained at Sloper's closure was a testimonial signed by a number of Sloper's customers. The testimonial is dated 18<sup>th</sup> July 1894 and consisted of a simple open letter addressed to Joseph Sloper & Co as shown below.

London, 18<sup>th</sup> July 1894

To Messrs J. Sloper & Co. 20 King William Street, E.C.

Gentlemen,

In reply to your enquiry as to whether we have found your system of perforating stamps satisfactory – we beg to state having been supplied with perforated stamps for some time past we are able to say the work done by you has given us perfect satisfaction, and we have found it a great protection against purloining or misappropriation.

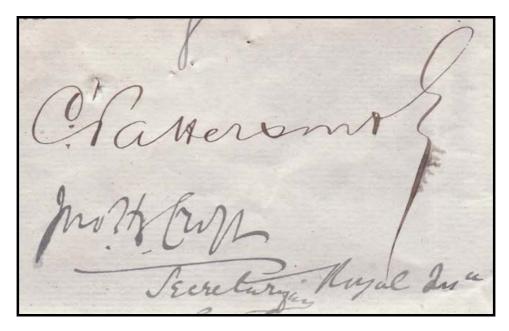

We are, Gentlemen

Yours faithfully

Below this simple declaration are the signatures of fifty-six of his then current customers, all of which were based or had offices in London. Luckily for us, the Sloper papers also included a typed list of these customers with a simple address. I say luckily as many of the signatures and customer's names are very hard to decipher. A full list of these customers is included in Table 1.

Of the fifty-six names on the list we have confirmed identified dies for thirty-two of them and provisional dies for a further thirteen. That leaves just eleven users for which dies used around 1894 have not yet been identified. Table 2 lists those eleven customers to which I have added additional information as to their address and business taken from a Kelly's 1895 Trade Directory. Five of the customers are well known users of perfins however no die in the 1894 period has yet been

associated with them. Another five are known perfin users and for one C. Paterson & Co I cannot find any record.

I wondered if Slopers had made a mistake in drawing up their list from the testimonial and had counted Carter Paterson twice so I went back to the original testimonial and certainly there are two entries as can be seen above.

So the challenge now is to find out whether C. Patterson & Co of Fenchurch Street, London EC really existed and to find the ten dies that were being used by the other customers at this period. This task may not be so easy as for instance there are six WT/&S dies used in this period that may have been used by Ward, Sturt & Sharp.

One question though remains – why was the testimonial produced. It seems clear that it was initiated by Sloper rather than being a spontaneous event from grateful customers. Maybe Slopers felt that they could use such a testimonial in trying to drum up additional business at a time when more and more rival perforators were springing up in London.
