Michael Millar picked up a rather nice perfin postcard. It cost him \$17.50 - roughly £8.75. The impression on the postcard isn't perfinned but because it was going out of the country it required an additional ½d, which was. He asks "are these cards quite common? Do other members have similar cards?"	Despatched in Parcel* \$\frac{\mathbb{E}}{2-2}\$ Date 2 = 2 = 190 Hz per Setter post, First
