D. Overseas Perfins/Articles

The numbers in the index represent the Bulletin Number followed by the page number/s after the decimal point. However, some of the earliest Bulletins did not have all the pages numbered. Some of the references in the Bulletin may only represent one line of print, others a whole page but put together they do add to our knowledge of a particular facet of the hobby.

Most references to Railways, Officials and Councils have been omitted where these pre-date the issue of handbooks. These bits of information from the Bulletin were later incorporated into the Society Handbooks on these subjects: copies obtained through publications. Also omitted are most references to Catalogues as the Librarian has produced a list of Catalogues that are available in our Society Library.
