

Perfin Dies Recorded with Line Engraved 1d Plate 225

Plate 225 was registered, along with plates 221-224, on 31st December 1878, but not put to press until 27th October 1879. The 1d Red was replaced on 1st January 1880 by the 1d Venetian Red, leaving barely two months for the printers (Perkins, Bacon & Co) to make use of plate 225. It is not known how many sheets were printed but it was defaced, along with 32 other 1d plates, on the 8th April 1880. Despite its rarity, or perhaps because of it, at least 34 perfin dies are known with 50 examples overall mainly used in London. This list is correct to 4th October 2025.
