

HMBMDC Supported Histiocytic Sarcoma Clinic

Clinic fee \$25 for HMBMDC members and \$35 nonmembers. Test cost not included.

The HMBMDC would like to support breeders in an easier, more affordable option to complete the histiocytic sarcoma pretesting. With the expense of purchasing the test, out of country shipping, and difficulties navigating the process it can be overwhelming for breeders. We want to open the opportunity to as many as possible.

**Friday
Sept. 29th, 2023**

**Monroe County Fairground
3775 S. Custer Rd. (M-50)
Monroe, MI 48161**

Clinic will begin one hour following the conclusion of breed judging.
PLEASE DO PREREGISTRATION!! Contact is at the bottom.

Process

You will create an account with Antagene prior to the blood drawl. **You will pay for the Antagene histiocytic sarcoma test online before coming to the clinic.** Creating this account and paying will make the process of receiving your results back much smoother. You then will bring your pet to the clinic, we will collect the blood, have you fill out some paperwork, and then do a group shipment saving you on the shipping cost! The clinic fee is a cheaper alternative that pays for the cost of shipping and paying our veterinarians.

Hunter Calvelage will help people navigate the Antagene website and work through any questions. If you need or would like help with the online steps her contact information is at the bottom. When paying for a test with card, you are likely to be denied at first due to it being an out of country payment. You will have to call your bank, approve the charge, and repurchase the test once approving the payment. **Tests will need to be paid for prior to attending the clinic.**
