ancient plants.
MODERN TECHNOLOGY.

Marijuana Vs Hemp

Cannabis Sativa

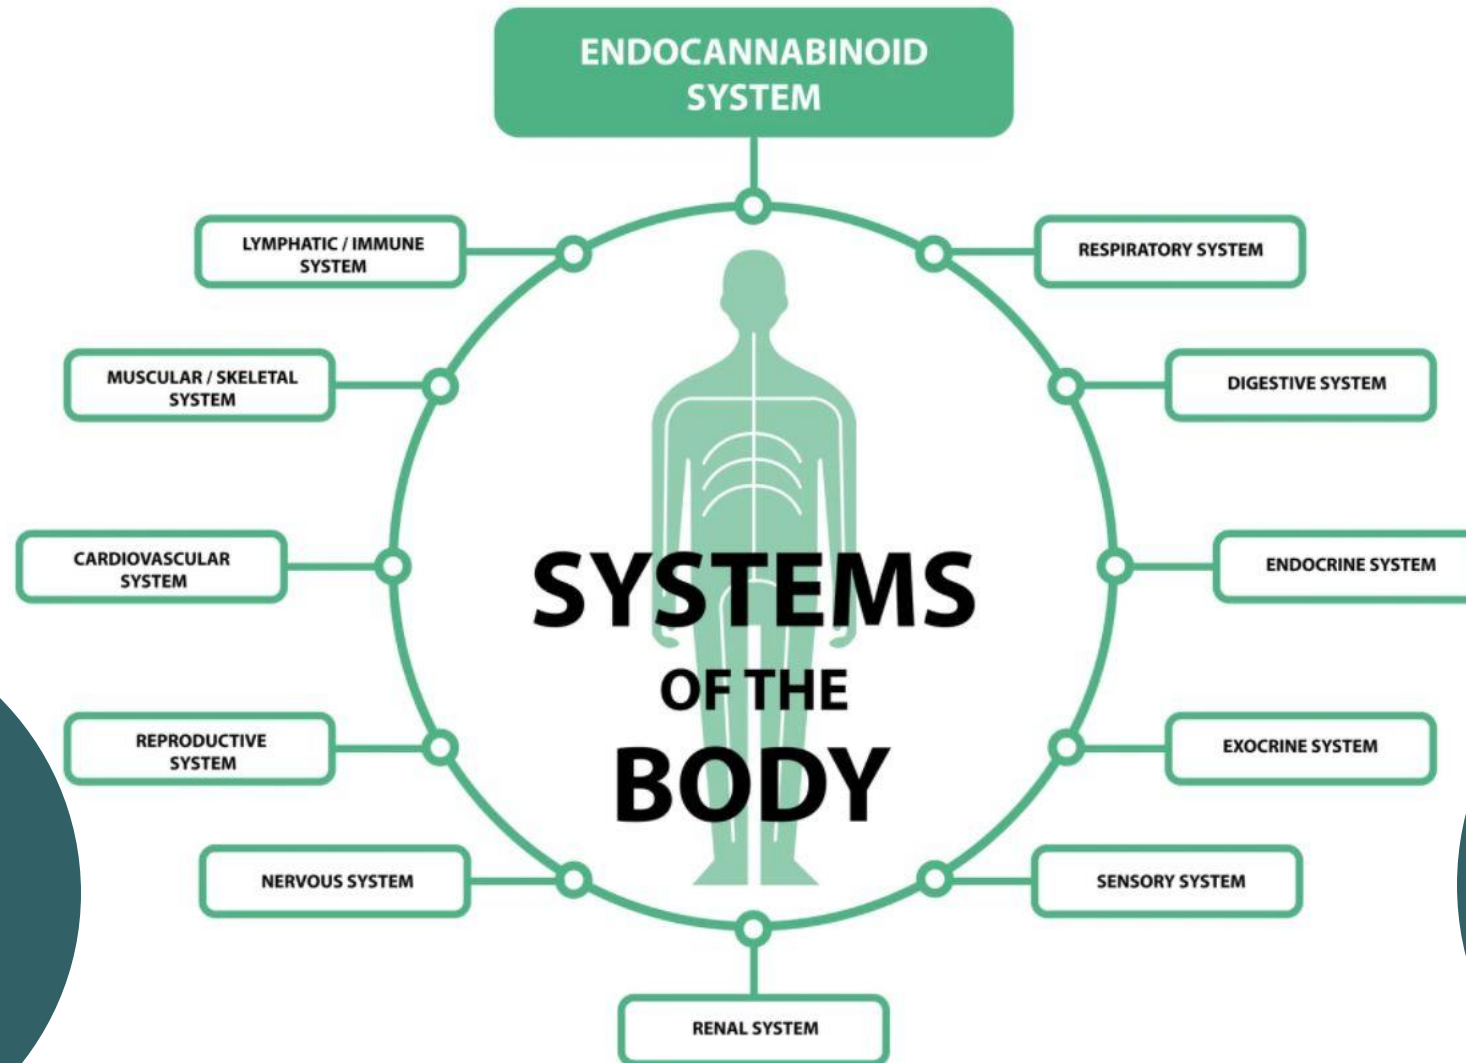

Dry weight per volume
must be less than 0.3% THC to be hemp.

Genus > Species > Subspecies

The Endocannabinoid System

Healthy ECS System = Homeostasis

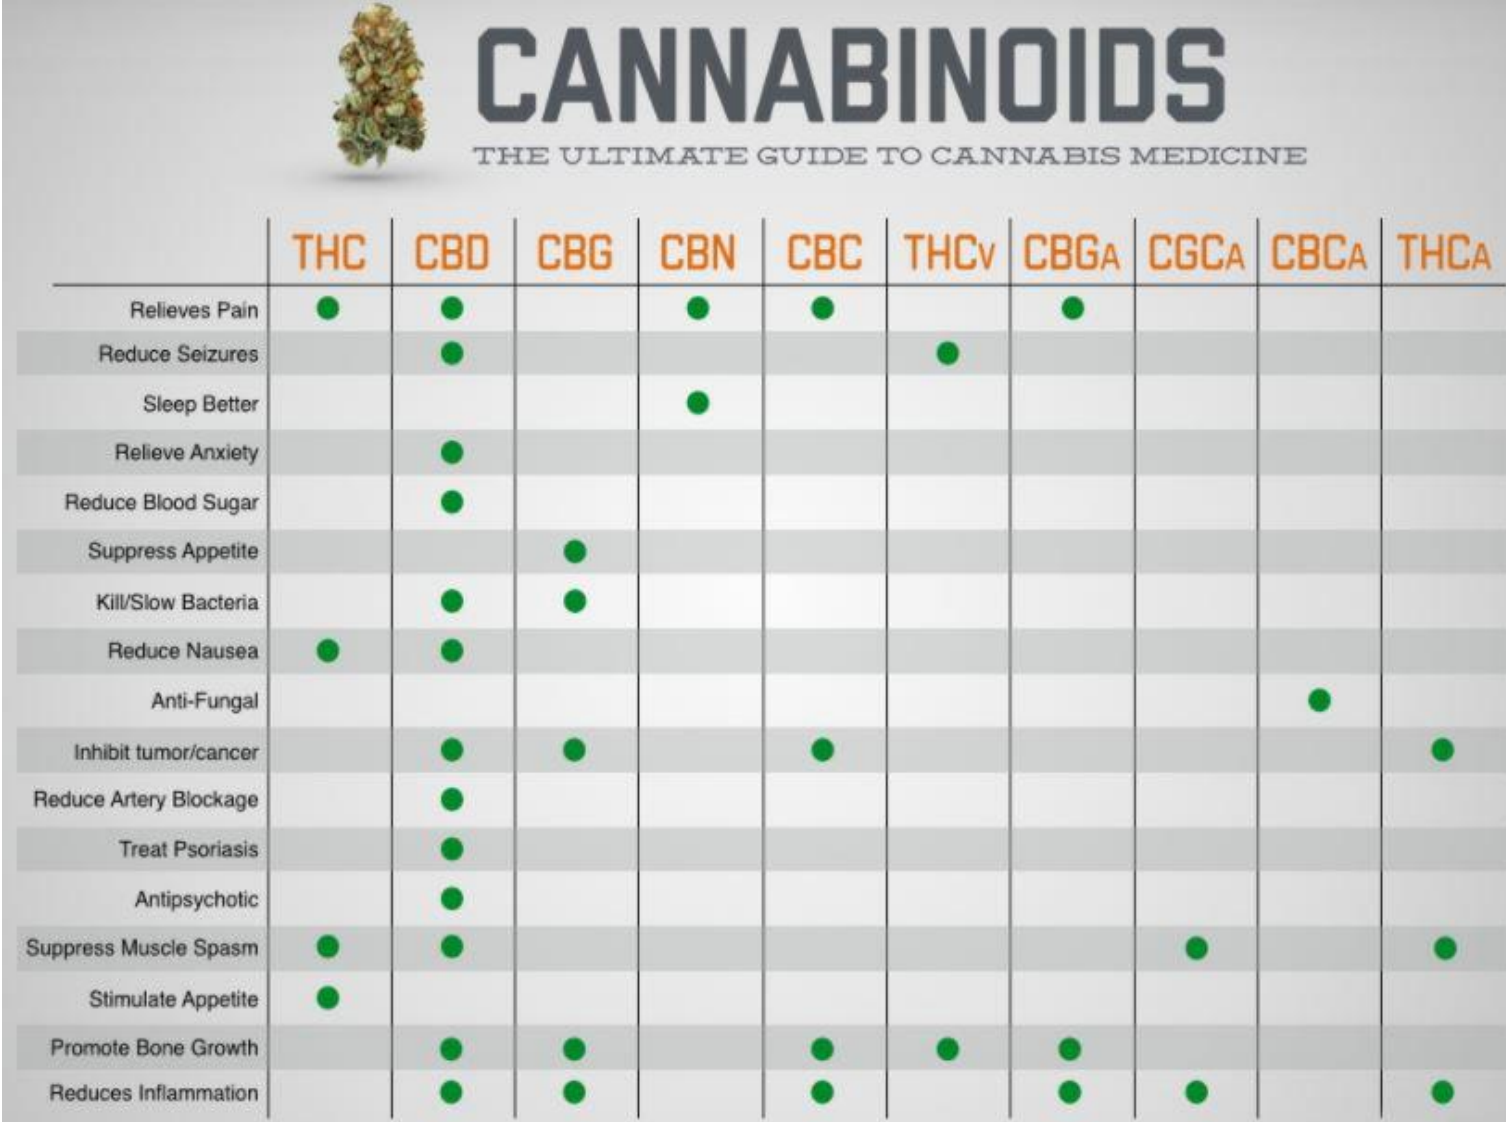

We have cannabinoid receptors from head to toe!

All mammals have an ECS designed to accept cannabinoids like CBD

Our Endocannabinoid System (ECS) is the manager of all of our body's other systems, helping our bodies find overall "homeostasis"

Prevalent Cannabinoids Found in Nature

	THC	CBD	CBG	CBN	CBC	THCv	CBGA	CGCA	CBCA	THCA
Relieves Pain	●	●		●	●		●			
Reduce Seizures		●				●				
Sleep Better				●						
Relieve Anxiety		●								
Reduce Blood Sugar		●								
Suppress Appetite			●							
Kill/Slow Bacteria		●	●							
Reduce Nausea	●	●								
Anti-Fungal									●	
Inhibit tumor/cancer		●	●		●					●
Reduce Artery Blockage		●								
Treat Psoriasis		●								
Antipsychotic		●								
Suppress Muscle Spasm	●	●						●		●
Stimulate Appetite	●									
Promote Bone Growth		●	●		●	●	●			
Reduces Inflammation		●	●		●		●	●		●

CBD is the
“workhorse”

But other
Cannabinoids
have great health
benefits as well!

What is
Full
Spectrum
vs. Broad
Spectrum?

So What Makes Green Compass Different?

people building change.
people helping

HEAL PEOPLE.

IDENTIFYING QUALITY PRODUCTS

CERTIFICATE OF ANALYSIS

Product should specify the total amount of CBD content and provide certificate of analysis to prove strength and purity.

CLEAN SOIL

Hemp absorbs contaminants out of the soil, so it is important to have clean soil to start with.

CERTIFIED ORGANIC

Have peace of mind knowing your hemp was grown in the absence of herbicides and pesticides.

CARBON DIOXIDE EXTRACTION

Environmentally friendly, CO₂ preserves cannabinoids better than solvents (ethanol, butane).

HEMP FLOWER

“Aerial parts” include the fibrous parts of hemp plants which have negligible amounts of cannabinoids.

COCONUT OIL

Coconut oil can carry more CBD molecules and ultimately deliver more cannabidiol to our cells for absorption.

3 DIFFERENT **DELIVERY METHODS**

- Water soluble delivery
- Sublingual delivery
- Topical delivery

WHAT IS SUBLINGUAL DELIVERY

When an oil-based CBD is ingested, it needs a carrier oil, like MCT, to help deliver it to the system. Holding the oil under the tongue for 60 seconds before swallowing allows the CBD to be “carried” into the system through the glands in the mouth.

Full-Spectrum, Broad-Spectrum, and Isolate Tinctures

Pet Tinctures

WHAT IS WATER SOLUBLE DELIVERY?

By reducing the molecules to a nano-size, or water-soluble size, the body is better able to absorb the CBD into the system. This creates a higher bio-availability.

Bioavailability

Definition: The proportion of the drug or other substance which enters the circulation when introduced into the body and is available to have an active effect.

WHAT IS TOPICAL DELIVERY

CBD can also be delivered topically instead of ingested. Topical products are applied directly to the skin at the problem areas and absorb over a period of time for maximum benefit.

ADVOCATE!

THE SOCIAL SELLING INDUSTRY

Social selling is the #1 way to get a product to a consumer globally.

The industry reported annual sales of \$35.4 billion worldwide... more than doubling the annual revenue of the NFL.

According to a recent Zapier study, 34% of Americans currently have a side hustle.

61.1 million plan to start a side hustle in 2021.

The “additional source of income” is alive and well!

RIGHT PLACE RIGHT TIME

- Do your due diligence.
- Allow yourself to dream about the possibilities.
- Make a decision either way.
- Don't have regrets!
- If it's not for you, who do you know?
- Talk to the person who invited you and they'll walk you through the next steps

**“The future depends
on what you do today.”**
