	<u>CSP-PO</u>
	Classroom training required Time in role requirement/No Assessment Bi-annual renewal required

Professional Product Owner Training with Improving

Professional Product Owner Training Schedule

Course Details:

- The Professional Scrum Product Owner (PSPO) course is a 2-day course where the instructor teaches participants how to maximize the value of software products and systems.
- Product Ownership in Scrum today requires more than understanding of how to write requirements or manage a Product Backlog. Professional Scrum Product Owners need to have a concrete awareness of everything that drives value from their products.

Additional Resources

Suggested Reading for the Professional Product Owner

- Books, Videos, Scrum.org blogs, Community Forums

The Product Owner Learning Path

- Understanding and Applying Scrum/Empiricism
- Managing Products with Agility
- Developing and Delivering Products Professionally
- Evolving the Agile Organization

Soul of Scrum

- Blog, Resources, Agile Games

Build a Product Owner Community

- Create a forum where Product Owners build relationships and support each other
- Strive for inclusiveness by bringing in new Product Owners and those interested in the profession
- Share resources and suggestions for continued learning and growth
- Attend Sprint Reviews of other Product Owners to observe and learn from their stakeholder interactions
