

AFRICA E5 Foundation

Mission: To educate and empower citizens of Africa to own their growth.

The Pillars:

Educate – Education that is holistic (Head, Heart, and hands) is at the foundation of the work we do at the foundation. Access to educational opportunities formal and informal can alter the trajectory of a person's life. The foundation believes that education is the greatest asset you can give to people.

Empower – Via education we strive to empower the next generation of entrepreneurs to recognize their talents and employ them to grow Africa into the economic powerhouse of the future.

Expand – The foundation will work tirelessly to promote a growth mindset. Having a growth mindset will expand the possibilities and the reach of the foundation.

Engage – Through the engagement of local communities, organizations, groups, and companies, following the Economy of Communion philosophy of the Focolare Movement, the foundation will exceed the goals it has set. We know that the work we are setting out to accomplish will only be realized via thoughtful and meaningful engagement with others and the community – hence the Global Compact of Education Philosophy as promoted by Pope Francis.

Entrepreneurship – Entrepreneurship is the product of this foundation. Growing entrepreneurs will stop brain drain. Will improve the economy and most importantly will allow families and communities to thrive.
