

ROAD UPDATE-MAY 13, 2024

THIS IS TO BRING EVERYONE UP TO DATE ON THE STATUS OF THE ROAD RE-SURFACING.

The resurfacing company is going to fix the holes in front of your house today, but not the next time.....STOP,STOP,.....STOP!

- 1) BACKING OUT OF YOUR DRIVEWAY AND STOPPING ON THE STREET, TURNING YOUR WHEELS WHILE STOPPED AND THEN PROCEEDING FORWARD. This damages the freshly installed surface.

Whether the material was “old style” hot asphalt or is “new style” cold emulsion turning your wheels in place cause’s holes in the surface. While leaving your driveway swing around in the correct direction and then pull forward.

- 2) Regarding surface finish, again driving on it will even out the surface finish and color. This is just like asphalt. Drive around our community and see the different textures and colors from previous asphalt projects.
- 3) When using the clubhouse parking lot, we do angle parking. Start moving before turning your wheels.
- 4) Further, we will not be “line striping” the parking lot for 2 weeks to ensure the paint strips will stay the required color.

Please leave a reasonable space between cars.

I am sorry for the concern this has caused, and I am sure there will still be other issues. Therefore, go to the HOA office and get a **compliant form**; complete it as required so it can be handled properly. Return it to the EVHA white mailbox out front for processing.

Regards, Rod Sutton - President
