Summary Report for: houstonblindsforless.com								
This report provides link and business directory submission details.								

Business Citations & Search Engine Submissions

Business Citations include Online Yellow Pages, Local Business Directories, Industry (Vertical) Business Directories, Voice Search (like Apple's Siri), GPS Systems (like Ford or GM vehicle dashboard GPS) and other niche business resources. Submissions are made through the data aggregator Infogroup, which is the largest data aggregator. Infogroup submissions distribute business data to over 200 business resources websites. Examples include DexKnows, Manta, InsiderPages, CityGrid and YellowBot.

Search Engine Submissions include major search engine submissions like Google, Bing and Yahoo, as well as minor search engine submissions like ExactSeek, ASR and Entireweb. Over 30 search engines in all have received your URL submission after data is shared between search engine partners. For example, Yahoo! uses search data from Bing, and AOL uses search data from Google. The largest US and Canada search engines include (in order): Google 1.8 bil/mo, Bing 500 mil/mo, Yahoo 490 mil/mo, ASK 300 mil/mo, AOL 200 mil/mo, DuckDuckGo 150 mil/mo, WebCrawler 25 mil/mo, [Search.com](https://www.search.com/) 20 mil/mo, DogPile 12 mil/mo, Excite 8 mil/mo.

Some business submissions will expire and some will not auto-update if your business contact information changes. We regularly resubmit your business listing data to ensure constant listings across all business citations and search engine resources. If your contact information changes (Name, Phone, Address, URL, etc.), let us know so that we can resubmit your data and refresh your contact information.

Summary	Rankings	Links	Keywords	Tasks	Baseline	PPC	Last Month	*NOTICES
Summary Report for: houstonblindsforless.com This report provides task details for your campaign.								

Recent Campaign Activities

***Note:** The tasks outlined below were performed through this reporting period. Some tasks are completed monthly, some quarterly and others on an as-needed basis. A description of each task is provided under the *Initial Campaign Launch Details* section further below.

Technical SEO

- Google SITE: Test (innapropriately indexed content)
- Robots.txt Evaluation (communicates to search engines which pages will be indexed)
- Compromized Site Evaluation (hacked, virus, broken)
- SEO Work Integrity Evaluation (was SEO work removed or altered?)
- SiteMap Health (does SiteMap reflect live website?)
- SiteMap Crawl (are submitted pages being crawled by Google?)
- Search Console Security Evaluation (did Google identify website security issues?)
- Search Console Crawl Error Evaluation (is Google crawling all pages successfully?)
- Search Console Crawl Speed Evaluation (does Google load pages quickly?)
- Search Console Alerts Evaluation (did Google identify a moderate or severe website issue?)
- Search Console Site Traffic & Ranking Evaluation (search ranking and traffic trends)
- Search Console Keyword Collection and Review (collection of active search phrase rankings for reporting purposes)

Off-Site SEO

- Inbound Link Evaluation (identification and disavow of bad inbound links)
- Business Citation Submissions (submissions or refreshing submissions)
- Google My Business Dashboard Review (accuracy, optimization quality)
- Inbound Link Volume (monitoring inbound link growth and loss of key links)
- Geographic Targeting Review (local [city, state], national, international)
- Google My Business Negative Review Monitoring
- Google Analytics Review
- Search Engine Crawling (delisted by a major search engine?)

On-Site SEO

- Content Optimization Effectiveness Evaluation
- Search Engine Visibility Evaluation (did search visibility increase over prior month?)
- Keyword Volume Check (did volume of ranked keywords increase over prior month?)
- Google Search Algorithm Evaluation (will search algorithm changes impact the website?)
- Duplicate Content Spot-Check
- New Content Identification and Review
- Nurturing up-and-coming rankings (low hanging fruit)

Initial Campaign Launch Details

***Note:** The list below shows a summary of the initial campaign launch tasks completed through the first month of service. Many one-time-only tasks are executed within the first month of service, which our outlined below. These steps ensure that all future SEO work completed for the campaign will reach maximum potential. Details are also provided for each task to outline their importance and why we perform these tests and tasks.

- **Baseline Report:** A search ranking report was created to capture website search rankings that existed before the work from this SEO campaign kick-in. This gives us the ability to monitor the growth and progress of this campaign over time - where we are now vs. where we started.
- **Keyword Research:** Completed of a keyword discovery process to identify the best search phrases to target. Target search phrases are used through the content optimization process.
- **Google Analytics:** Successfully installed and/or gained access to Google Analytics. Analytics data can be extracted to help direct SEO and provide reporting.
- **Google Search Console:** Successfully installed and/or gained access to Google Search Console (formerly Google Webmaster Tools). Google Search Console provides website diagnostic and reporting data directly from Google that can be used to monitor website health can campaign performance.
- **XML Sitemap:** Successful creation of an XML search engine sitemap. Sitemaps can be accessed by all search engines that use sitemaps, including Google, Bing and Yahoo. Sitemaps ensure that all web pages can be found by the search engines, and also helps to identify website crawling issues.
- **Robots.txt Evaluation:** Review of the Robots.txt file, which provides website access instructions for all major search engines. Improper Robots.txt setting will block the search engines from crawling parts, or all, of a website.
- **Duplicate Content Check:** Portions of the website were tested for content duplication. Duplicate content will directly and significantly impact search engine ranking potential for all web pages with duplicate content.
- **Google My Business:** The Google My Business listing was either created or optimized. Google My Business listings are influential for local-based SEO campaigns and the SEO process can improve their performance. National and international SEO campaigns can still benefit from a Google My Business listing, but to a lesser degree.
- **Archived Web Pages:** Web pages that are included in the SEO campaign have been archived at archive.org. This is completed as a safety measure in case SEO work must be undone. After the SEO work is completed, the web pages are archived again, providing a before-and-after snapshot. This enables us to easily restore our SEO work should it be deleted. SEO work is often deleted if website plugins are removed, a website is restored from an old backup file, the website is redesigned, web host problems occur or other technical issues arise.
- **Inappropriate Content Indexed:** Oftentimes search engines will find and index content not intended to be views by the public. This may include Tag, Category, Author and PlugIn content, or web pages created by a website hack event. This type of content can cause ranking penalties from Google. A technical scan of the website has been completed to identify inappropriately indexed content.
- **Devalued Content Check:** Portions of the website were evaluated for devalued content. Devalued content is content where a website visitor must complete an action in order to view content. This includes content behind a web page accordion block, content that fades/slides in when mousing down, infinite scroll content or hidden content. If content critical to SEO is identified to be devalued, a notification would be made.
- **Secure Hosting (SSL):** As of October, 2017 Google Chrome displayed warnings for non-SSL websites, resulting in weakened click-through rates. In May, 2018, Google began to penalize rankings for non-SSL websites.
- **Responsive Design:** Google currently evaluates only the mobile/responsive rendering of a website. Non-responsive websites will receive ranking penalties from Google. The responsive version of any website is the only version Google evaluates in consideration for keyword rankings.
- **Page Speed:** Google factors the page load time and other website properties that impact user-friendliness as a search ranking signal. We periodically speed test the website as speed can change over time based on many design and hosting factors.
- **Business Directory Submissions:** A business directory listing campaign was launched successfully. This effort will disburse business listing data to directory websites, online yellow pages, GPS data services (like TomTom) and Voice Search platforms like Apple's Siri, Android and Windows phones. The data propagates to network partners, ranging from days to months to completely propagate.
- **Search Engine Submissions:** Website submissions to over 25 USA based search engines, including all major engines (Google, Bing and Yahoo) and numerous tierâ€2 search engines like Jayde, Lycos and AltaVista.
- **SEO Strategy:** After reviewing the baseline ranking report, identifying industry-specific target search phrases, evaluating the website and campaign objectives, we developed a strategy to guide the SEO campaign.
