Residential Fire Sprinkler Connection Charge

Property Address: _____

Owner Name: _____

Owner mailing address: _____

Phone Number: _____

In accordance with the Town Code, I acknowledge financial responsibility for any costs associated with installing a new water service to accommodate the mandated residential fire sprinkler. A deposit in the amount of \$1,500.00 is due prior to issuance of a building permit. I understand that if the cost to install the service is greater than \$1,500.00 I will be billed the overage and agree to pay that amount prior to the issuance of an occupancy permit. I also understand that if the cost to install the service is less than \$1,500.00 the Town will issue a refund to me when an occupancy permit has been issued. These charges are in addition to the \$100.00 residential fire sprinkler capacity charge that is also due prior to issuance of a building permit.

Applicant is responsible for submitting plans to the State Fire Marshall's office, and for scheduling sprinkler rough in, and final inspections with the same. Framing and final building inspections will only be scheduled after Fire Marshall's approved inspections.
