

Project Engineer (PE)

About Kempton Rinard, Inc. (Tampa)

Kempton Rinard is an award-winning civil engineering and landscape architecture firm providing services for educational, municipal, corporate, federal and recreational projects. We serve a multitude of clients in Florida and across the southeast United States. We are seeking a full-time project engineer to join our growing company.

Position Overview:

This position will be expected to plan, design, and manage multidisciplinary projects consisting of municipal infrastructure for public and private clients. This individual will work on all phases of civil engineering including grading, paving, stormwater management systems, water and wastewater design. The job will also require conducting permit and code research, writing specifications, and preparing permit applications for submission. Must also be able to interact with clients, perform inspections, attend meetings, and develop cost estimates.

Required Skills:

- 5+ years of experience (preferred)
- Bachelor of Science degree in Civil Engineering from an ABET accredited college.
- Professional Engineer's license in the state of Florida or the ability to obtain within six (6) months
- Ability to handle multiple projects concurrently
- AutoCAD Civil 3D knowledge
- Experience in site plan preparation, grading, alignments, etc.
- Proficient knowledge of modeling in stormwater, water and wastewater design and grading and a good understanding of current rules and regulations associated with civil design elements
- Understanding of municipal engineering principles and state regulations
- Working knowledge of MS Office

Duties and Responsibilities:

- Develop the design concept plans of various projects
- Perform field observations of construction where appropriate
- Review and analyze land surveys and construction plans
- Construct technical narratives relevant to site specific information and stormwater permit requirements
- Perform design calculations, writing reports, preparing Construction Documents and specifications, and developing cost estimates
- Prepare change orders, pay estimates, status reports, and project inspection reports
- Provide project coordination with clients and other design subconsultants while managing projects to meet client expectations, project scheduling and construction budgeting.
