Cathedral High School teaches the young men of this bi-national region a strong sense of faith, service and community. Our innovative learning models rooted in the Lasallian tradition recognize that each student is created in the image of God with infinite worth. With focus on positioning students for future opportunities, we cultivate the academic, college transition, career, spiritual, and life readiness of each student for an ever-changing global reality. Where there is need we serve, where there is ignorance we teach, and where there is despair we share our hope.

"Teach a youth about the way he should go; even when he is old he will not depart from it." – Proverbs 22, 6
