## WHAT WERE THE FUND COSTS FOR THE PAST YEAR? (based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Pemberwick Fund	\$38	0.37%

## HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

For the fiscal year ended March 31, 2025, the Fund generated a total investment return of 5.03% net of expenses compared to the Bloomberg U.S. Aggregate Bond Index return of 4.88% (which excludes expenses). Yields on the 2-Year Treasury decreased throughout the year, resulting in the Fund’s net asset value (“NAV”) steadily increasing from \$9.93 on April 1, 2024 to \$9.96 as of March 31, 2025.

## POSITIONING

The Fund continues to be invested primarily in investment grade floating rate bonds issued by financial institutions with assets greater than \$250 billion (50% of the Fund’s net assets). The Fund’s strategy is to purchase these floating rate bonds with shorter durations, not exceeding two years, picking up additional yield from the financial sector without taking any more risk in our opinion and tracking the Fed’s current interest rate position.

## HOW DID THE FUND PERFORM OVER THE PAST 10 YEARS?\*

The \$10,000 chart reflects a hypothetical \$10,000 investment in the Fund. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees and other expenses, were deducted.
